A Word to Potential Investors

Who can invest in these funds

The shares in the SICAV-FIS are exclusively offered to well-informed as defined in article 2 of the SIF Law.

All investments involve risk

With these funds, as with most investments, future performance may differ from past performance. There is no guarantee that any fund will meet its objectives or achieve any particular level of performance.

Fund investments are not bank deposits. The value of your investment can go up and down, and you could lose some or all of your invested money. Levels of income could also go up or down (as a rate or in absolute terms). No fund in this prospectus is intended as a complete investment plan, nor are all funds appropriate for all investors.

Investments in these funds are only suitable for well-informed investors who can afford the risks involved.

Before investing in any fund, you should understand its risks, costs and terms of investment, and how well these characteristics align with your own financial circumstances and risk tolerance.

As a potential investor, it is your responsibility to know and follow all applicable laws and regulations, including any foreign exchange restrictions, and to be aware of potential tax consequences. We recommend that you consult an investment adviser, legal adviser and tax adviser before investing.

Any difference among portfolio security currencies, share class currencies, and your home currency may expose you to currency risk. If your home currency is different from your share class currency, the performance you experience as an investor could be very different from that of the share class.

Marketing of the shares in the SICAV-FIS

Distributing this prospectus, offering these shares for sale, or investing in these shares is legal only where the shares are registered for public sale or where sale is not prohibited by local law or regulation. This prospectus is not an offer or solicitation in any jurisdiction, or to any investor, where not legally permitted or where the person making the offer or solicitation is not qualified to do so.

The shares in the SICAV-FIS may not be directly or indirectly offered or sold in the USA. Unless otherwise decided by the board or the AIFM US persons may not subscribe for shares.

US persons do not include any "Non-United States person" as used in Rule 4.7 under the U.S. Commodity Exchange Act, as amended. Therefore, US taxpayers, as defined for US federal income tax purposes, may subscribe for shares in the SICAV-FIS as long as they do not qualify as US persons.

For more information on restrictions on share ownership, contact us (see below).

Which information to rely on and legal implications of the contractual relationship

In deciding whether or not to invest in a fund, you should look at (and read completely) the most recent prospectus, the articles, the application form including the terms and conditions, the relevant PRIIPs KID and the most recent financial reports. These documents are available as described in **"Notices and Publications"** Together, all these documents and the financial reports contain the only approved information about the funds and the SICAV-FIS. Information in this prospectus, or any document about the SICAV-FIS or funds, may have changed since the publication date.

In case of any inconsistency in translations of this prospectus or the financial reports, the English version will prevail.

Fund Descriptions

All of the funds described in this prospectus are part of Nordea Specialised Investment Fund, SICAV-FIS, which functions as an umbrella structure for them. The main objectives of Nordea Specialised Investment Fund, SICAV-FIS are to provide a range of funds with active and professional management and to obtain a satisfactory long-term yield, with due consideration to the risk profile of the funds.

By law and regulation, each fund is permitted to invest as described in "General Investment Powers and Restrictions" on page 19, and is equally required to comply with the restrictions stated in that same section. However, each fund also has its own investment policy, which is generally narrower than what is permitted by law and regulation. Descriptions of the specific investment objectives, main investments, and other key characteristics of each fund begin on the next page.

The board of the SICAV-FIS has overall responsibility for the SICAV-FIS's business operations and its investment activities, including the investment activities of all of the funds. The board has delegated the day-to-day management of the funds to the AIFM (as defined below), which in turn has delegated some of its functions to investment managers and service providers. The board retains supervision over the AIFM.

Several share classes of the SICAV-FIS have been listed on the Luxembourg Stock Exchange, please consult the link here for details. More information about the SICAV-FIS, the board, the AIFM and the service providers appears in the final sections of this prospectus, "The SICAV-FIS" and "The AIFM".

Terms with specific meanings

The terms below have the following meanings in this prospectus.

AIF An alternative investment fund within the meaning of the AIFM Directive (as defined below).

AIFM Directive Directive 2011/61/EU of the European Parliament and of the Council of 8 June 2011 on Alternative Investment Fund Managers as amended from time to time.

AIFM Law The Luxembourg law of 12 July 2013 on alternative investment fund managers, as amended from time to time.

AIFM Nordea Investment Fund S.A., the Alternative Investment Fund Manager of the SICAV-FIS.

AIFM Regulation The Directive 2011/61/EU of 8 June 2011 on Alternative Investment Fund Managers, as amended from time to time.

articles The articles of incorporation of the SICAV-FIS.

base currency The currency in which a fund does the accounting for its portfolio and maintains its primary NAV.

board The Board of Directors of the SICAV-FIS.

business day Each day the AIFM is open for business. This excludes all legal and bank holidays in Luxembourg as well as Good Friday and 24 December. At its discretion, the AIFM may also be closed on other days; in such cases, investors will be notified as required by law.

CSSF The Commission de Surveillance du Secteur Financier, which is the main financial regulatory authority in Luxembourg

dealing day A business day that is a valuation day when we process your dealing request. If a dealing day is not a valuation day, the dealing day will be the next following valuation day. See Dealing schedule in the fund descriptions for the dealing day applied to a given fund.

eligible state Any state that the board considers to be consistent with a given fund's investment portfolio.

EMIR The Regulation (EU) No 648/2012 of 4 July 2012 on OTC derivatives, central counterparties and trade repositories, as amended from time to time, more commonly known as the European Market Infrastructure Regulation .

ESG environmental, social and corporate governance.

GDPR The Regulation (EU) 2016/679 of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, as amended from time to time, more commonly known as the General Data Protection Regulation.

investor a well-informed investor, as defined below.

NAM Nordea Asset Management, the asset management business conducted by Nordea Investment Funds S.A. and Nordea Investment Management AB, including its branches and subsidiaries.

NAV Net asset value.

Nordea Group Nordea Bank Abp and all its affiliated entities, including Nordea Investment Funds S.A.

PAI The most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

personal data Any information relating to an identified or identifiable natural person within the meaning of GDPR.

PRIIPs KID Key information document for packaged retail and insurance-based investment products.

prospectus This document.

regulated market A regulated market within the meaning of the Directive 2014/65/EU of 15 May 2014 on markets in financial instruments, as amended from time to time, or any other market in an eligible state that is regulated, regularly operating, recognised, and open to the public.

SFDR RTS The Commission Delegated Regulation (EU) 2022/1288 of 6 April 2022 supplementing Regulation (EU) 2019/2088 of the European Parliament and of the Council with regard to regulatory technical standards specifying the details of the content and presentation of the information in relation to the principle of 'do no significant harm', specifying the content, methodologies and presentation of information in relation to sustainability indicators and adverse sustainability impacts, and the content and presentation of the information in relation to the promotion of environmental or social characteristics and sustainable investment objectives in pre-contractual documents, on websites and in periodic reports, as amended from time to time, more commonly knowns as the regulatory technical standards of the SFDR

SFDR The Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial services sector, as amended from time to time.

SICAV-FIS Nordea Specialised Investment Fund, SICAV-FIS.

SIF Law The Luxembourg law of 13 February 2007 relating to specialised investment funds, as amended from time to time.

sustainability factors Environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

sustainability risk Environmental, social or governance events, or conditions that, if they occur, could cause a negative material impact on the value of the investment.

UCITS Law The Luxembourg law of 17 December 2010 on Undertakings for Collective Investment , as amended from time to time.

US person Any of the following, but not limited to:

- a US resident, a trust of which a US resident is a trustee, or an estate of which a US resident is an executor or administrator
- a partnership or corporation organised or incorporated under US federal or state law
- an agency or branch of a non-US entity located in the US
- a non-discretionary or similar account (other than an estate or trust account) that is held by a dealer or other fiduciary for the benefit or account of a US person
- a discretionary or similar account (other than an estate or trust account) that is held by a dealer or other fiduciary organised, incorporated or (if an individual) residing in the US
- a partnership or corporation organised or incorporated by a US person under non-US laws primarily for investing in securities that are not registered under the Securities Act of 1933 (as amended), unless organised or incorporated and owned by accredited investors (as defined in the Securities Act of 1933) who are not natural persons, estates or trusts
- any other U.S. person defined by US Rule 902 of the Securities Act of 1933

valuation day A day for which a NAV is published.

Unless otherwise defined for a particular fund, a business day is not a valuation day if, on that day, any stock exchange or market on which a substantial portion (as determined by the board or its designee) of the fund's investment trades is closed, restricted, suspended, cancelled or otherwise altered.

we, us The SICAV-FIS, acting through the board or through any service providers described in this prospectus except for the auditor and any distributors and /or the AIFM.

well-informed investor Well informed investor, as defined in article 2 of the Luxembourg law of 13 February 2007 relating to specialised investment funds, as amended from time to time.

you Any past, current or prospective investor, or an agent for the same.

Nordea Specialised Investment Fund, SICAV-FIS —
European Senior Loan Fund

Investment Objective and Policy

Objective The fund seeks to achieve attractive risk-adjusted total returns for its shareholders by investing primarily in the non-investment grade corporate debt markets in Europe.

Benchmark Bloomberg European Leveraged Loan Index (Price >= 90, CCC and better), hedged to EUR. For performance comparison only.

Investment policy The fund invests in debt obligations with varying terms relating to seniority or subordination, purchase price, payment type and maturity, such as public and private non-investment grade bonds, secured loans, second lien debt and other securities with fixed-income characteristics, without limitation in the size, type, structure, terms, geography, or sector.

The fund's assets will be mainly invested in broadly syndicated senior secured loans and/or their functional equivalent (e.g. senior secured floating rate notes), denominated in European currencies. The fund targets the most liquid syndicated loans in order to further increase the liquidity of the fund.

The fund may be exposed to other currencies than the base currency through investments and/or cash holdings. In this fund, the majority of all currency exposures are hedged to the Base currency.

The fund may use derivatives, such as FX forwards, for hedging and risk management purposes.

The fund may hold ancillary liquid assets (including, cash and short term bank deposit) and money market instruments)

The Fund promotes environmental and/or social characteristics within the meaning of article 8 of the SFDR, as further explained in Appendix I.

Usage of TRSs None expected.

Techniques and Instruments None expected.

Investment Restrictions The following investment restrictions will apply:

(i) the fund will not invest more than 6% of its total assets in any underlying issuer, provided that at any time an increased limit of 7.5% will apply with respect to two underlying issuers;

(ii) the fund will not invest more than 25% of its total assets in underlying issuers which primarily operate in the same industry, as reasonably determined by the investment manager, using the institutionally recognised classification system as the investment manager in its sole discretion deems appropriate.

The restrictions outlined above will not apply to securities issued or guaranteed by a sovereign state, which is a member of the OECD, by any such state's local government authorities, or by public international bodies.

The restrictions outlined above may not apply during the first 6 months after the initial subscription day to allow time for the portfolio construction process.

The fund will not participate in the origination of loans.

The fund may not use financial derivative instruments for investment purposes nor use techniques and instruments related to transferable securities and money market instruments for the purpose of efficient portfolio management. For the avoidance of doubt, the fund may hold ancillary liquid assets, as outlined in "Investment policy" section of "European Senior Loan Fund", for the purposes of cash management.

The fund may not grant credit facilities or issue guarantees on behalf of third parties.

The fund may not carry out short sales transactions on transferable securities.

The fund may not invest in precious metals or certificates representing the same.

The fund may not invest in certificates representing commodities.

The fund may borrow the equivalent of up to 10% of its Net Asset Value (measured at the time of such borrowing) for temporary liquidity management purposes at then-current market rates, usually with short term maturities.

Sustainability risk integration Sustainability risk is assessed and integrated in the due diligence process.

Potential exclusions of certain sectors from the investable universe are expected to reduce the sustainability risk of the fund. Conversely, such exclusions may increase the concentration risk of the Fund which could – seen in isolation – result in higher volatility and a greater risk of loss.

The fund does not consider PAI on sustainability factors.

See **"Sustainability Risk integration applicable to all funds"** and **"Risk Descriptions"**.

Investment manager(s) Nordea Investment Management AB.

Base currency EUR.

Subscription fee Up to 3% of the NAV of the shares being subscribed may be charged to the investor in favour of the AIFM and/or the respective distributor(s) and/or sales agent(s).

Redemption fee Up to 1% of the Net Asset Value of the Shares being redeemed may be charged to the shareholders in favour of the fund.

Risk considerations

Read the **"Risk Descriptions"** section carefully before investing in the fund, with special attention to the following:

- Liquidity
- Loans
- Credit
- Sub-investment grade and unrated debt obligations
- Prepayment and extension

Dealing schedule and restrictions specific to the European Senior Loan Fund

Cut-off	Valuation day	NAV release	Settlement	
			Subscriptions	Redemptions
Each last business day of a month	The last business day of the month following cut-off	At the latest on the 15th business day following the relevant valuation day	1 business day after the relevant valuation day	In principle no later than 25 business days after the relevant valuation day

Extended settlement period Should the fund not be able to provide sufficient liquidity to accommodate a redemption, the payment of Redemptions may not be carried out on the date set in the table above. In such exceptional cases, Shareholders will be informed before the 25th business day after valuation day and the payment date may, in principle, be postponed to 25 business days from the following valuation day.

Payment of subscriptions and redemptions shall be made in the denominative currency of the share class. The board or the AIFM may decide to defer the settlement day due to currency holidays.

Restrictions on subscriptions and switches In order to inter alia protect existing shareholders, the board (or any delegate duly appointed by the board), may, at any time, decide to close a fund or a share class and hence not to accept any further subscriptions into the relevant fund or share class.

Decisions taken by the board or its delegate on a closure may have immediate or non-immediate effect and be effective for non-determined period of time. Any fund or share class may be closed to subscriptions and conversions in without notice to shareholders.

Indeed, the closed fund or share class may be re-opened when the Board of Directors or its delegate deems the reasons to have the latter closed no longer applying.

A reason for a closure may be among others that the size of a given fund has reached such a level that the market it is invested into has also reached its capacity level and thus the fund can no longer be managed according to the defined objectives and investment policy.

Limits for subscriptions New net subscriptions are limited per month to 25% of the value of the fund's shares in issue at the end of the preceding month. The board or the AIFM, may increase or lower the percentage based on the AIFM's analysis of the dilution of existing investors and of available investment opportunities.

Limits for redemptions Requests for net redemptions are limited per month to the lower of EUR 100,000,000 or 5% of the value of the fund's Shares in issue at the end of the preceding month. The board, or the AIFM, may increase or lower such amount or percentage based on the AIFM's analysis of available liquidity.

If the fund receives net subscriptions or redemptions in excess of the limits described above for a given period, the AIFM in its capacity as transfer and registrar agent will process the relevant excess amount in the following period with priority given over new subscription and redemption orders respectively. Excess applications received for a given Valuation Day will be processed strictly in the order in which they are received.

The board or the AIFM may decide that all excess applications received for a given Valuation Day will be subject to a pro rata reduction such that the limits are not exceeded.

The board, or the AIFM, may decide at their discretion to not accept redemptions in the fund for a period of up to 12 months, if justified in the interest of shareholders in view of the liquidity of the portfolio. Shareholders will be informed in such event.

Anti-dilution levy Up to 5% under normal circumstances may be charged on subscriptions and redemptions and credited to the fund. The AIFM may decide on the appropriate levels of such levy depending on market considerations to compensate for the costs generated by the purchase and sale of fund's assets caused by subscriptions and redemptions. Anti-Dilution levy should be charged to redeeming investors in case the number of redemptions exceed the number of subscriptions, or vice-versa, to subscribing investors in case the number of subscriptions exceed the number of redemptions, resulting in a change in the net assets of the fund.

Re-organisation of classes of shares In the event that, for any reason, the board determines that (i) the net asset value of any class of shares has decreased to, or has not reached, the minimum level for that class of shares to be managed and/or administered in an efficient manner, or (ii) changes in the legal, economic or political environment would justify such reorganization of classes of shares, or (iii) a product rationalisation or any other reason would justify such reorganization of classes of shares, the board of directors may decide to re-allocate the assets and liabilities of that class to those of one or several other classes within the SICAV-FIS and to re-designate the shares of the class(es) concerned as shares of such other share class(es) (following a split or consolidation, if necessary, and the payment to shareholders of the amount corresponding to any fractional entitlement). The shareholder of the class of shares concerned will be informed of the reorganisation by way of a notice and/or in any other way as required or permitted by applicable laws and regulations.

Use of liquidity management tools The liquidity management tools mentioned in section **"Investing in the Funds"** under sub-heading **"Liquidity Management Tools"** are not available for the European Senior Loan Fund.

Nordea Specialised Investment Fund, SICAV-FIS —
Global Infrastructure Fund

Investment Objective and Policy

Objective To obtain superior returns and to achieve capital growth over the long-term by investing globally in infrastructure funds, primarily within OECD countries.

Benchmark The fund does not measure its performance against a benchmark.

Investment policy The fund will invest in Infrastructure funds providing exposure to the facilities, assets or companies that are considered essential for a functioning society, such as power, transport, water and waste, through equity and debt investments. The allocation of assets shall primarily be infrastructure funds which the investment manager considers to be at the lower end of the infrastructure risk spectrum.

The fund will seek to provide a broad diversification across funds, sectors and infrastructure assets and follow the principle of risk spreading. The fund may invest in both regulated and unregulated infrastructure assets and private infrastructure companies, such as utilities, energy, transportation or telecommunications.

The fund may invest in infrastructure funds which are in the fund raising phase ("primaries"), but may also acquire interests in previously launched infrastructure funds on the secondary market ("secondaries") and make co-investments. Typically secondaries have already invested a significant portion of their assets in operating companies.

The fund's assets will be invested mainly in primary funds, both closed-ended and open-ended in nature, complemented by secondary and co-investment vehicles, giving immediate exposure to a range of infrastructure assets and strategies.

The capital allocated to infrastructure funds or similar vehicles only becomes invested when fund commitments are actually drawn, which may take several years. To maximise the share of invested capital, the fund may make commitments in excess of current liquid assets, based on anticipated and actual future cash flows from, inter alia, distributions from investments and subscriptions of shares by investors. Conversely, anticipated redemptions or reductions in liquid assets through drawdown will also be taken into account.

The fund may sometimes concentrate its portfolio holdings in some markets or infrastructure sub-asset classes which, in light of investment considerations, market risks and other factors, the investment manager believes will provide the best opportunity for high risk-adjusted appreciation in the value of the fund's assets.

The Board may at its discretion, with prior approval from the CSSF, alter investment policies provided that any material change in the investment policy is notified to the Shareholders and this Prospectus is updated accordingly.

The fund may establish credit lines to borrow up to 25% of its net assets provided this borrowing is on a temporary basis to meet redemption orders or to balance disparities between commitments taken up by the fund and returns on existing investments.

The fund considers principal adverse impacts sustainability factors.

The Fund promotes environmental and/or social characteristics within the meaning of article 8 of the SFDR, as further explained in Appendix I.

Investment Restrictions The fund may not make any commitment to a single infrastructure fund in excess of 30% of its net assets at the time of commitment. As required by CSSF Circular 25/901, the target infrastructure fund will be subject to risk-spreading requirements at least comparable to those applicable to SIFs.

The fund may not make any investment in a single listed infrastructure investment vehicle in excess of 20% of its net assets at the time of investment.

The fund may not make direct investment in a single infrastructure asset in excess of 10% of its net assets at the time of commitment.

The restrictions outlined above may not apply during the first 2 (two) years after the initial subscription day to allow time for the portfolio ramp-up and construction.

Should these restrictions be exceeded as a result of the exercise of rights attached to the investments or for any reason other than investments (for example market or currency fluctuations), no remedial action will be required merely for this reason, but the priority objective in sales transactions must be the remedying of the situation taking due account of the interests of the Shareholders.

The fund will not invest in any security, option of financial or forward contract in which the liability of the holder is unlimited. The fund will not knowingly invest in any open-ended or closed-ended infrastructure fund, listed infrastructure investment vehicle or infrastructure company or assets which permits investment in any security, option of financial contract in which the liability of the holder is unlimited.

For the purpose of investments in both open-ended and closed-end infrastructure funds, the Fund will ensure that the targeted funds comply with the principle of risk spreading and have a diversified asset base.

Usage of TRSs None expected.

Techniques and Instruments None expected.

Investment manager(s) Nordea Investment Management AB.

Base currency EUR.

Risk considerations

Read the **"Risk Descriptions"** section carefully before investing in the fund, with special attention to the following:

- Liquidity
- Infrastructure investments
- Over- commitment
- Funds of funds

Sustainability Risk Integration Sustainability risk is assessed and integrated in the due diligence process of each investment. When funds are investing in externally managed funds, the external managers' ESG capabilities, policies, integration and related practices are assessed and integrated into the investment decision process together with traditional investment criteria.

Potential exclusions by external managers of certain sectors from the investable universe are expected to reduce the sustainability risk of the fund. Conversely, such exclusions may increase the concentration risk of the fund which could – seen in isolation – result in higher volatility and a greater risk of loss.

See **"Sustainability Risk integration applicable to all funds"** and **"Risk Descriptions"**.

Nordea Specialised Investment Fund, SICAV-FIS —
Global Private Credit Fund

Investment Objective and Policy

Objective To provide long-term capital appreciation by investing in the global private credit markets.

Benchmark The fund does not measure its performance against a benchmark.

Investment policy The fund offers investors access to a diversified portfolio of private credit strategies. Specifically, the fund will invest in closed-ended private credit funds or equivalent investment vehicles across seniority, security and vintage as well as industry and geography. The fund may also enter into private loans directly through co-investments, either directly or indirectly through co-investment vehicles, where the investment manager identifies an opportunity for attractive risk-adjusted returns in the primary or secondary market.

The target funds are typically set up as limited partnerships or limited liability companies and managed in accordance with an investment agreement. Capital is committed upfront and the relevant fund manager invests the committed capital over a two to three year investment period on a buy-to-hold basis. Thereafter the investments will gradually pre-pay or expire over time and capital may be re-invested into another vehicle, depending on the market opportunities at the time.

The fund may also invest into open-ended bond and loans funds for liquidity management purposes.

Such investments should be subject to risk-spreading requirements at least comparable to those applicable to SIFs.

The fund is expected to hold liquid assets including cash in current accounts and money market instruments for liquidity purposes.

The capital allocated to private credit funds or similar closed-ended vehicles only becomes invested when fund commitments are actually drawn, which may take several years. To maximise the share of invested capital, the fund may make commitments in excess of current liquid assets, based on anticipated and actual future cash flows from, inter alia, distributions from investments and subscriptions of shares by investors. Conversely, anticipated redemptions or reductions in liquid assets through drawdown will also be taken into account.

The fund may be exposed to other currencies than the base currency through investments and/or cash holdings. Any significant currency exposures will be hedged to the base currency of the fund on a regular basis.

The board or AIFM may at its discretion alter investment policies provided that any material change in the investment policy is notified to the Shareholders and this Prospectus is updated accordingly.

The fund considers principal adverse impacts on sustainability factors.

The Fund promotes environmental and/or social characteristics when selecting new investments within the meaning of article 8 of the SFDR, as further explained in Appendix I.

Investment restrictions The fund may not make any commitment or subscription to a single private credit fund or any equivalent investment vehicle in excess of 30% of its net assets at the time of commitment or subscription.

The fund may use derivatives, such as FX forwards, for hedging and risk management purposes.

The fund may invest more than 30% of its net assets in single open-ended bond and loan funds provided that the single open-ended fund complies with the investment restrictions of the fund.

The fund may not enter into private loans with the same company, in excess of 5% of its net assets at the time of commitment.

The fund may only invest in instruments, vehicles or contracts with limited liability.

The fund may borrow cash up to 25% for liquidity management provided this borrowing is on a temporary basis and in the best interests of Shareholders to meet redemption orders or to balance disparities between commitments taken up by the fund and returns on existing investments.

Usage of TRSs None expected.

Techniques and instruments None expected.

Investment manager(s) Nordea Investment Management AB.

Base currency EUR.

Risk considerations

Read the **"Risk Descriptions"** section carefully before investing in the fund, with special attention to the following:

- Liquidity
- Over-commitment
- Private credit investments
- Funds of funds

Sustainability risk integration Sustainability risk is assessed and integrated in the due diligence process of each investment. When funds are investing in externally managed funds, the external managers' ESG capabilities, policies, integration and related practices are assessed and integrated into the investment decision process together with traditional investment criteria.

Potential exclusions by external managers of certain sectors from the investable universe are expected to reduce the sustainability risk of the fund. Conversely, such exclusions may increase the concentration risk of the fund which could – seen in isolation – result in higher volatility and a greater risk of loss.

See **"Sustainability Risk integration applicable to all funds"** and **"Risk Descriptions"**.

Nordea Specialised Investment Fund, SICAV-FIS —
Global Private Equity Fund

Investment Objective and Policy

Objective To obtain superior returns and to achieve capital growth over the medium and long-term by investing in private equity. The allocation of assets shall provide a broad diversification and follow the principle of risk spreading.

Benchmark None.

Investment policy The fund's assets will be invested mainly in private equity by investing either directly, indirectly or through co-investment vehicles in (i) private equity funds, including fund of fund, (ii) listed private equity investment vehicles and (iii) private equity companies.

The fund may invest in private equity funds and private equity fund of funds which are in the fund raising phase ("primaries"), but may also acquire interests in previously launched private equity funds on the secondary market ("secondaries"). Typically secondaries have already invested a significant portion of their assets in non-public and public operating companies.

Direct investments in private equity companies shall only result from external corporate events related to an underlying investment (including but not limited to splits, mergers, distribution in kind) and be disposed of on the short term.

The Fund promotes environmental and/or social characteristics within the meaning of article 8 of the SFDR, as further explained in Appendix I.

Investment restrictions The fund may commit up to 100% of its net assets to a single private equity fund of funds, provided that the private equity fund of funds complies with the investment guidelines set out below for investments by the fund in private equity funds.

The fund may not make any commitment to a single private equity fund in excess of 20% of its net assets at the time of commitment.

The fund may not make any investment in a single listed private equity investment vehicle in excess of 20% of its net assets at the time of investment.

The fund may not make any investment in a single private equity company in excess of 10% of its net assets at the time of commitment.

Should these restrictions be exceeded as a result of the exercise of rights attached to the investments or for any reason other than investments (for example market or currency fluctuations), no remedial action will be required merely for this reason, but the priority objective in sales transactions must be the remedying of the situation taking due account of the interests of the Shareholders.

The fund will not invest in any security, option of financial or forward contract in which the liability of the holder is unlimited. The fund will not knowingly invest in any private equity fund, private equity fund of funds, listed private equity investment vehicle or private equity company which permits investment in any security, option of financial contract in which the liability of the holder is unlimited.

For the purpose of investments in private equity funds and private equity fund of funds, the fund will ensure that the targeted funds and fund of funds comply with the principle of risk spreading and have a diversified asset base.

The capital allocated to private equity funds or similar closed-ended vehicles only becomes invested when fund commitments are actually drawn, which may take several years. To maximise the share of invested capital, the fund may make commitments in excess of current liquid assets, based on anticipated and actual future cash flows from, inter alia, distributions from investments and subscriptions of shares by investors. Conversely, anticipated redemptions or reductions in liquid assets through drawdown will also be taken into account.

The fund may sometimes concentrate its portfolio holdings in some markets or private equity sub-asset classes which, in light of investment considerations, market risks and other factors, the investment manager believes will provide the best opportunity for high risk-adjusted appreciation in the value of the fund's assets.

The board may at its discretion alter investment policies provided that any material change in the investment policy is notified to the Shareholders and this Prospectus is updated accordingly.

The fund may establish credit lines to borrow up to 25% of its net assets provided this borrowing is on a temporary basis to meet redemption orders or to balance disparities between commitments taken up by the fund and returns on existing investments.

Usage of TRSs None expected.

Techniques and instruments None expected

Risk considerations

Read the **"Risk Descriptions"** section carefully before investing in the fund, with special attention to the following:

- Liquidity
- Over- commitment
- Funds of funds
- Private equity investments

Sustainability risk integration Sustainability risk is assessed and integrated in the due diligence process of each investment. When funds are investing in externally managed funds, the external managers' ESG capabilities, policies, integration and related practices are assessed and integrated into the investment decision process together with traditional investment criteria.

Potential exclusions by external managers of certain sectors from the investable universe are expected to reduce the sustainability risk of the fund. Conversely, such exclusions may increase the concentration risk of the fund which could – seen in isolation – result in higher volatility and a greater risk of loss.

The fund considers principal adverse impacts on sustainability factors.

See **"Sustainability Risk integration applicable to all funds"** and **"Risk Descriptions"**.

Responsible Investment Policy

The board believes that responsible investing is an important part of good corporate citizenship as well as being important for long-term value creation. All funds adhere to the principles of the NAM Responsible Investment Policy. The NAM Responsible Investment Policy describes the framework governing the approach of NAM to responsible investments and is accessible via nordea.lu.

The Responsible Investment Policy and activities are overseen by the Responsible Investment Committee of NAM. The committee includes members from the Senior Executive Management team and is chaired by the Head of NAM.

NAM has signed the UN Principles for Responsible Investments and are thus committed to integrating ESG factors into our investment analysis, decision-making processes and active ownership practices.

Baseline ESG safeguards applicable to all funds

NAM's responsible investment framework also comprises a baseline integration of ESG safeguards. The ESG safeguards consist of norm-based screening and exclusions lists, implemented across the product range as relevant to ensure the portfolio meets a minimum standard independent of the individual portfolios' ESG ambitions.

Further, the funds include additional ESG features. For specific information on which additional ESG features are integrated in investment decisions of a strategy for any Article 8 funds of the SFDR, and the likely impacts of sustainability risks on the returns of relevant strategy reference is made to Appendix I.

Sustainability Risk integration applicable to all funds

Sustainability risks are considered in the investment decision process together with traditional investment risks (for example market, credit or liquidity risk). Sustainability risks may have a significant impact on traditional investment risks and be a factor that contributes to their materiality.

NAM integrates sustainability risk considerations in the investment decision-making process by

- Ensuring that investment managers and analysts have access to relevant ESG information, making it possible to identify sustainability risks within the investable universe.
- Including and considering sustainability risks as part of investment evaluation in line with the investment strategy of each product.
- Identifying, evaluating and taking relevant action on issuers exhibiting high exposure to sustainability risk. How sustainability risk considerations are integrated in practice differ among our investment teams as the relevance, availability of information and time horizon of sustainability risks will vary depending on the fund's characteristics including asset class, investment strategy, client objectives.

Additional expertise in the sustainability risk domain may be provided by our analysts in our Responsible Investment team, which is responsible for supporting our analysts and investment managers ultimately responsible for the investment decision process.

The Risk Management Function, which is independent from our Investment department, perform risk oversight, monitoring and escalation based on established policies.

A statement on Sustainability risk integration in the investment decision-making process and a statement on integration of sustainability risks in remuneration are available here.

Statement on the environmental and social characteristics and the applied methodologies

A statement on the environmental and social characteristics and the applied methodologies ("SFDR article 10" statements) is available here.

Risk Descriptions

All investments involve risk.

The **"Fund Descriptions"** list what we believe to be the main risk factors of the funds and you will find below their description. However a fund could potentially be affected by risks beyond those listed in the **"Fund Descriptions"** or described here, nor are these risk descriptions themselves intended to be exhaustive. Each risk is described as if for an individual fund.

Any of these risks could cause a fund, to perform less well than similar investments or a benchmark, to experience high volatility (ups and downs in NAV), or to fail to meet its objective over any period of time and cause you to lose some or all your money.

Contingent liability risk The fund may from time to time incur contingent liabilities in connection with an investment. For example, the fund may acquire a revolving credit or delayed draw term facility that has not yet been fully drawn. If the borrower subsequently draws down on the facility, the fund will be obligated to fund the amounts due, which might ultimately have to be funded by the investors. There can be no assurance that the fund will adequately reserve for their contingent liabilities and that such liabilities will not have an adverse effect on the fund.

Counterparty risk Any entity with which the fund does business, including the depositary, could become unwilling or unable to meet its obligations to the fund.

Under any of the following circumstances, the fund could lose some or all of its money and could experience delays in getting back securities, loans or cash that were in custody of the counterparty. This could mean the fund is unable to sell the securities or receive the income from them during the period in which it seeks to enforce its rights, a process that itself is likely to create additional costs. In addition, the value of the securities could fall during the period of delay.

Agreements with counterparties can be affected by liquidity risk and operational risk (including the risk of human error and criminal activity), either of which could cause losses or limit the fund's ability to meet redemption requests.

However, the value of collateral might not cover the full value of a transaction and might not cover any fees or returns due to the fund.

If any collateral the fund holds as protection against counterparty risk (including assets in which cash collateral has been invested) declines in value, it may not fully protect the fund against losses.

Difficulties in selling collateral may delay or restrict the ability of the fund to meet redemption requests.

Also, in some jurisdictions, collateral agreements (even those using industry-standard language) could prove difficult or impossible to enforce.

Credit risk A bond or money market instrument could fall in price, and become more volatile and less liquid, if the credit quality of the issuer or the security declines, or the market believes it might. In extreme cases a debt investment could go into default, meaning its issuer could become unable to make timely payments to the fund. Adverse effects of environmental issues, such as climate change and natural disasters, may erode the financial health of a bond issuer.

Bonds that are in default may become illiquid or worthless. Trying to recover principal or interest payments from a defaulted issuer can be difficult, particularly if the bonds are unsecured or subordinate to other obligations, and can involve additional costs.

Prepayment and extension risk. Any unexpected behaviour in interest rates could hurt the performance of callable debt securities (securities whose issuers have the right to pay off the security's principal before the maturity date).

When interest rates fall, issuers tend to pay off these securities and re-issue new ones at lower interest rates. When this happens, the fund may have no alternative but to reinvest the money from these prepaid securities at a lower rate of interest ("prepayment risk").

At the same time, when interest rates rise, borrowers tend not to prepay their low-interest mortgages. This can lock in the fund to receiving below-market yields until interest rates fall or the securities mature ("extension risk"). It can also mean that the fund must either sell the securities at a loss or forgo the opportunity to make other investments that may turn out to have performed better.

The prices and yields of callable securities typically reflect the assumption that they will be paid off at a certain point before maturity. If this prepayment happens when expected, the fund generally will not suffer any adverse effects. However, if it happens substantially earlier or later than expected, it can mean that the fund effectively overpaid for the securities.

These factors can also affect the fund's duration, increasing or decreasing sensitivity to interest rates in undesired ways. In some circumstances, the failure of rates to rise or fall when anticipated could cause prepayment or extension risks as well.

Currency risk To the extent that the fund holds assets that are denominated in currencies other than the base currency, any changes in currency exchange rates could reduce investment gains or income, or increase investment losses, in some cases significantly.

Exchange rates can change rapidly and unpredictably, and it may be difficult for the fund to unwind its exposure to a given currency in time to avoid losses.

Changes in exchange rates can be influenced by such factors as export-import balances, economic and political trends, governmental intervention and investor speculation.

In addition, investors may experience currency risk if the currency in which they subscribe or redeem is different to the base currency of the fund. Changes in currency exchange rates between the base currency and the share class currency can reduce investment gains or income, or increase investment losses, in some cases significantly.

Intervention by a central bank, such as aggressive buying or selling of currencies, changes in interest rates, restrictions on capital movements or a "de-pegging" of one currency to another, could cause abrupt or long-term changes in relative currency values.

Loans risk There is limited historical data available as to the levels of defaults and/or recoveries that may be experienced on loans and no assurance can be given as to the levels of default and/or recoveries that may apply to any loan acquired by the fund.

Recoveries on loans will be affected by the particular circumstances of the borrower and its owners and creditors, its assets and other factors. Ultimate recovery rates are difficult to predict and may not achieve the fund's investment return objectives.

In principle, when the fund acquires or has exposure to a senior secured loan and/or their functional equivalent in respect of an underlying issuer, it generally will have the benefit of a security interest in the available assets of the underlying issuer, which should mitigate the risk that it will not be repaid. When the fund acquires or is exposed to second-lien or other subordinated loans, in the event the borrower defaults and lacks sufficient assets to satisfy the fund's loan and/or declares bankruptcy, the fund may not have full recourse to the assets of the borrower, or the assets of the borrower may not be sufficient to satisfy the loan. In addition, as certain loans may be subordinate to other debt of the borrower, if the borrower defaults on the loan held by the fund, the loan will be satisfied only after all senior debt is paid in full. The fund may be invested in or exposed to unsecured loans which are not secured by collateral. In the event of default on an unsecured loan, the first priority lien holder has first claim to the underlying collateral of the loan. It is thus possible that no collateral value would remain for an unsecured holder and therefore result in a loss of investment to the fund. Because unsecured loans are lower in priority of payment to secured loans, they are subject to the additional risk that the cash flow of the borrower may be insufficient to meet scheduled payments after giving effect to the secured obligations of the borrower. Unsecured loans generally have greater price volatility than secured loans and may be less liquid.

Hedging risk Unless stated differently in section **"Fund Descriptions"**, the fund may use a variety of financial instruments, including derivatives, such as options, interest rate swaps, interest rate caps and interest rate floors, futures and forward, both for investment purposes and for risk management, i.e. hedging purposes. However, the investment manager is not obliged, and will not attempt to hedge all market risks or other risks inherent in the fund's positions. While the fund may use hedging within its portfolio to seek to reduce risk, hedging may result in a poorer overall performance for the fund than if it had not engaged in any such hedging . Moreover, it should be noted that the portfolio will always be exposed to certain risks that cannot be hedged, such as credit risk (relating both to particular securities and counterparties).

Investments which are in the form of loans or similar private credit instruments are not as easily purchased or sold as publicly-traded securities due to the unique and more customised nature of the debt agreement and the private syndication process. As a result, there may be a significant period between the date that a fund makes an investment and the date that any capital gain or loss on such investment is realised. Moreover, the sale of restricted and illiquid securities may result in higher brokerage charges or dealer discounts and other selling expenses than the sale of securities eligible for trading on national securities exchanges or in the over-the-counter markets.

Hedging risk – currency hedged share classes Any attempts to reduce or eliminate the effect of exchange rate fluctuations between the base currency of the fund and the currency of the share class may not be successful, especially during times of market volatility. Mainly due to interest rate differentials and costs associated with performing the hedging activity, the currency hedged share class may have a different performance to the equivalent share class in the base currency. The currency hedging on the hedged share classes has no correlation with the currency exposure of the fund´s portfolio holdings, which may include currencies other than the base currency of the fund or the currency of the share class.

It may not be possible to fully isolate all risks (such as counterparty risk) and all costs of currency hedged share classes from classes that are not currency hedged. An up-to-date list of share classes that could experience contagion risk is available on request and free of charge at the registered office of the management company.

Interest rate risk When interest rates rise, bond values generally fall. This risk is generally greater the longer the maturity or duration of the bond investment.

Investment fund risk As with any investment fund, investing in the fund involves certain risks an investor would not face if investing in markets directly:

- There can be no assurance that the investment objective of the fund will be achieved
- the actions of other investors, in particular sudden large outflows of cash or behaviour that results in a tax penalty for the fund, could cause losses to other investors
- the investor cannot direct or influence how money is invested while it is in the fund
- the fund is subject to various investment laws and regulations that limit the use of certain securities and investment techniques that might improve performance; to the extent that the fund decides to register in jurisdictions that impose narrower limits, this decision could further limit its investment flexibility and scope
- because the fund is based in Luxembourg, any protections that would be provided by other local regulators (including, for investors outside Luxembourg, those of their home regulator) may not apply
- because fund shares are not publicly traded, the only option for liquidation of shares is generally redemption, which the fund can suspend for any of the reasons described in section **"Rights We Reserve"** under **"Investing in the Funds"** and could be restricted as described in section **"Liquidity**

Management Tools" or subject to specific redemption policy as disclosed in the **"Fund Descriptions"**

- the fund's buying and selling of investments may not be optimal for the tax efficiency of any given investor
- to the extent that the fund invests in other UCITS/UCIs, it will have less direct knowledge of, and no control over, the decisions of the UCITS/UCI's investment managers, it could incur a second layer of investment fees (which will further erode any investment gains), and it could face liquidity risk in trying to unwind its investment in a UCITS /UCI
- to the extent that the SICAV-FIS conducts business with affiliates of Nordea Group, and these affiliates (and affiliates of other service providers) do business with each other on behalf of the SICAV-FIS, conflicts of interest may be created; to mitigate these, all such business dealings are conducted on an "arm's length" basis, and all entities, and the individuals associated with them, are subject to strict "fair dealing" policies that prohibit profiting from inside information and showing favouritism
- a fund may both issue new shares and redeem existing ones during its lifetime. Although the net issue and/or net redemption may be subject to restrictions, (i) a net issue has the effect of reducing the investment level which changes the risk/return profile of the fund and (ii) a net redemption may have the effect that assets of the fund have to be liquidated causing a change in the investment level and the risk/return profile.

Where a fund invests in another UCITS / other UCI, these risks apply to the fund, and in turn indirectly to investors.

Leverage risk The fund's high net exposure to certain investments could make its share price more volatile.

To the extent that the fund uses leverage to increase its net exposure to any market, rate, basket of securities or other financial reference source, fluctuations in the price of the reference source will be amplified at the fund level and, as such, may lead to important losses.

Liquidity risk Liquidity risk could affect the fund's value and its ability to pay redemption proceeds or to repay, for example, repurchase agreement proceeds by the agreed deadline. If the fund is forced to sell an illiquid asset to meet redemption requests or for other cash needs, the fund may suffer a loss.

Underlying close-ended funds in which the Funds invest are expected to generally invest in illiquid investments and the fund's interests in these underlying funds are generally expected to be highly illiquid and to be held for the medium to long term. There are no assurances that the underlying funds will be able to realise their investments and mature in a timely manner. There is no requirement or obligation on the Investment Manager to seek to realise the Funds' investment in these underlying funds in order to provide liquidity for Shareholders or to enable them to redeem their shares. Moreover, the funds will be a passive investor and will have no ability to influence or dictate the timing of any sales or exits of investments held by the underlying funds or co-investment which could generate liquidity for the funds. Investments held by underlying funds may be difficult to value and dispositions of such investments may require a lengthy time period. Prompt realisation of investments may not be possible. Consequently, the timing of cash distributions (generally to be reinvested in the funds) from realisations is uncertain and unpredictable.

While the funds can be redeemed on a monthly basis (as further detailed in Section Investing in the funds), there can be no guarantee that Shareholders seeking to redeem their Shares on any valuation day will be able to do so in full or at all, as circumstances may arise in which the AIFM or the Board deems it necessary or advisable to impose restrictions on redemptions. Please refer to Sections **"Liquidity Management Tools"** and **"Rights We Reserve"**.

Market risk Prices and yields of many securities can change frequently — sometimes with significant volatility — and can fall, based on a wide variety of factors.

Examples of these factors include:

- political and economic news
- government policy
- changes in technology and business practices
- changes in demographics, cultures and populations
- natural or human-caused disasters(including but not limited to pandemics), whether they qualify as force majeure or not
- cybercrime, fraud or other criminal activities
- weather and climate patterns
- scientific or investigative discoveries
- costs and availability of energy, commodities and natural resources

The effects of market risk can be immediate or gradual, short-term or long-term, narrow or broad.

Operational risk The fund could suffer losses due to errors, service disruptions or other failures, as well as fraud, corruption, cybercrime, instability, terrorism or other irregular events.

Operational risks may subject the fund to errors affecting valuation, pricing, accounting, tax reporting, financial reporting, custody and trading, among other things.

Operational risks may go undetected for long periods of time, and even if they are detected it may prove impractical to recover prompt or adequate compensation from those responsible.

Over-commitment Risk Investments in private equity, infrastructure or private credit funds are illiquid long-term investments. Capital is committed prior to being deployed and the fund may therefore "over-commit" itself due to the gap between committed, invested and returned capital, as stated in section **"Fund Descriptions"**. Although liquidity projection and risk control measures will be employed in order to balance the advantages and risks connected to such over-commitment, there can be no assurance that these measures will be sufficient nor that the fund will be able to otherwise successfully manage its commitment plan. This may have the effect that the fund is forced to borrow or to liquidate assets of the fund at a discount to meet capital calls and redemption requests. Moreover, any failure by the fund to satisfy these capital calls in a timely manner may subject the fund to penalties and impair the fund's ability to pursue its investment strategy.

Risks in relation to funds of funds Unless stated differently in the section **"Fund Descriptions"**, the funds may invest in fund of funds established in jurisdictions where no or limited supervision is exercised on such funds of funds by local regulators. Further, the efficiency of any supervision may be affected by a lack of precision of investment and risk diversification guidelines applicable to, and the flexibility of the investment policies pursued by, such funds of funds.

The specific investment policy of a fund, which is to invest also in funds of funds, may result in a possible double or even triple charging of certain fees and expenses for the investors. This will mainly be the case for the Management fee and Administration fee, costs incurred by the fund such as operating costs and auditor's fees. Investors in such funds will bear indirectly the management and advisory fees charged by the investment manager of the various funds of funds in which the fund invests.

It is possible that, even at times when such funds have a negative or zero performance, they will, indirectly, bear performance fees levied within individual funds and the underlying private equity funds and infrastructure funds.

Risks in relation to infrastructure investments
Infrastructure investments provide exposure to assets that typically display uncertainties which do not exist to the same extent in other investments (e.g. listed and non-listed securities related to corporate issuers).

Infrastructure funds invest across the risk and return spectrum in the ownership, financing, construction, development, renovation and operations of infrastructure assets, or the companies providing services and/or raw materials necessary for such construction and maintenance of infrastructure assets across sectors. Examples of infrastructure assets include, but are not limited to, utility assets (such as electric transmission and distribution lines, gas distribution pipelines, water and waste treatment assets), energy assets (such as renewable energy generation and battery storage assets), transportation assets (such as toll roads, airports, railroads, ports), and telecommunication assets (such as communication towers and data centres).

Consequently, the assets held in such infrastructure funds may be subject to a variety of both financial and non-financial risks, not all of which can be foreseen or quantified, including but not limited to, construction, operating, economic, environmental, political, regulatory and legal risks as well as changes in energy and commodity prices, demand and usage, economic outlook, interest rates and inflation. Certain infrastructure assets may also be subject to technological and technical risks, including the risk of mechanical breakdown, supply shortages of spare parts and other unanticipated events, which may materially and adversely affect operations such as force majeure acts, terrorist events and natural disasters (such as fire, floods, earthquakes and typhoons). There can be no assurance that any or all such risk can be mitigated and no guarantee that the infrastructure assets and technologies will perform as anticipated.

Risks in relation to private credit investments Private credit investments are comprised of bilaterally negotiated loans which are not tradeable instruments in contrast to their listed equivalents (e.g. corporate bonds). Borrowers can range from small and midsize private- or family-owned business to large private equity sponsors and the investments will vary in maturity and terms depending on the financing needs. Private credit is not issued or traded in the public market such as corporate bonds or syndicated loans and should hence be considered illiquid investments. Estimated risk of default and recovery rates will therefore be less observable and comparable to those of tradeable equivalents and are therefore subject to potentially greater pricing uncertainties.

Risks in relation to private equity investments Private equity investments typically display uncertainties which do not exist to the same extent in other investments (e.g. listed securities). Private equity investments range from investments in companies which have only existed for a short time, which have little business experience, whose products do not have an established market, or which are faced with restructuring etc. (typically classified as venture investments) to large management buyout transaction of well-established and sometimes listed companies (typically classified as buyout). Any forecast of future growth in value may therefore often be encumbered with greater uncertainties than in the case with many other investments.

Investment in private equity funds, as well as the underlying companies these funds invest in, tend to be more illiquid, and highly speculative. Private equity has generally been dependent on the availability of debt or equity financing to fund the acquisitions of their investments. Depending on market conditions, however, the availability of such financing may be reduced dramatically, limiting the ability of private equity funds to obtain the required financing or reducing their expected rate of return.

Sub-investment grade and unrated debt obligations risk Unless otherwise stated in section **"Fund Descriptions"**, the fund may invest in or have exposure to sub-investment grade debt obligations, such as senior secured, second-lien and mezzanine loans, high-yield bonds, payment-in-kind notes, collateralised loan obligations, equity and junior, unsecured, equity and quasi-equity instruments.

Investments in sub-investment grade debt obligations are subject to greater risk of loss of principal and interest than higher-rated securities and may be considered to be predominantly speculative with respect to the obligor's capacity to pay interest and repay principal. They may also be considered to be subject to greater risk than securities with higher ratings in the case of deterioration of general economic conditions. Because investors generally perceive that there are greater risks associated with non-investment grade securities, the yields and prices of such securities may fluctuate more than those for higher-rated securities. The market for non-investment grade securities may be smaller and less active than that for higher-rated securities, which may adversely affect the prices at which these securities can be sold and result in losses to the fund, which, in turn, could have a material adverse effect on the performance of the fund.

In addition, debt obligations which may be unrated by a recognised credit rating agency, are subject to greater risk of loss of principal and interest than higher-rated debt obligations or debt obligations which rank behind other outstanding securities and obligations of the obligor, all or a

significant portion of which, may be secured on substantially all of that obligor's assets. The fund may also invest in debt obligations which are not protected by financial covenants or limitations on additional indebtedness. In addition, evaluating credit risk for debt securities involves uncertainty because credit rating agencies throughout the world have different standards, making comparison across countries difficult. Any of these factors could have a material adverse effect on the performance of the fund.

Sustainability risks Sustainability risks may significantly increase the volatility of the investment return of the fund.

Examples of sustainability risks and how sustainability risks are integrated in our decision process can be found in the statement on sustainability risk integration in the investment decision-making process available via nordea.lu.

Tax risk Tax laws are complex and quite often not completely clear, and the tax consequences of a particular structure might be questioned or might be subject to challenge by the relevant tax authority in the country concerned. If the fund makes investments in a jurisdiction, the fund, some of its affiliates and/ or the Shareholders may be subject to tax in that jurisdiction or be required to file tax returns in that jurisdiction. There can be no assurance that the structure of the fund or any investment will be tax efficient for the fund and/or any particular Shareholders. A country could change its tax laws or treaties in ways that affect the fund or shareholders.

Tax changes potentially could be retroactive and could affect shareholders with no direct investment in the country.

General Investment Powers and Restrictions

Permitted assets, risk spreading and leverage

Permitted assets

Unless otherwise specified in the Fund Descriptions, any fund can invest in any type of assets. The funds are subject to the principle of risk spreading in accordance with CSSF Circular 25/901 and the AIFM Regulation. A fund may use instruments and techniques consistent with the AIFM Law, CSSF Circular 08/356, the Securities Financing Transactions Regulation (EU) 2015/2365 (SFTR) and any other applicable law and regulation. Each fund's usage must also be consistent with its investment objective and policies and will not increase its risk profile beyond what it otherwise would have been.

Risk spreading rules

The investment restrictions of the funds adhere to the following guidelines:

1)	In principle, no fund may invest more than 30% of its assets (excluding repos and reverse repos, if any) or commitments to subscribe securities of the same type issued by the same issuer and short sales may not result in the fund holding a short position in securities of the same type issued by the same issuer representing more than 30% of its assets (excluding repos and reverse repos, if any). These restrictions do not apply to: • investments in securities issued or guaranteed by an OECD country or its regional or local authorities or by EU, regional or global supranational institutions and bodies; • investments in target UCIs that are subject to risk-spreading requirements at least comparable to those applicable to SIFs. For the purpose of the application of this restriction, every fund of a target umbrella UCI is to be considered as a separate issuer provided that the principle of segregation of liabilities among the various funds vis-à-vis third parties is ensured.
2)	When using financial derivative instruments, the fund must ensure, via appropriate diversification of the underlying assets, a similar level of risk-spreading. Similarly, the counterparty risk in an OTC transaction must, where applicable, be limited having regard to the quality and qualification of the counterparty.
3)	Short sales may not in principle result in the fund holding a short position in securities of the same type issued by the same issuer representing more than 30% of its assets.

Leverage Leverage is a way for the funds to increase their exposure to underlying markets and/or securities generated by the instruments in the fund's portfolio, mainly through the use of financial derivative instruments. Additional other arrangements (including but not limited to securities lending, repurchase agreement or reinvestments of borrowing) can be used to create exposure. The AIFM is responsible for calculating the exposure of the funds in accordance with the AIFM Law.

Leverage is expressed as a ratio ('leverage ratio') between the exposure of the fund and its net asset value.

The leverage ratio is calculated in accordance with two methodologies for calculating the exposure of the funds, the gross method and the commitment method, as summarized in the below table.

Method	Description
Gross method	The exposure of the fund under the gross methodology consists of calculating (with the exclusion of any cash or cash equivalents) (i) the sum of the absolute values of all positions, (ii) the sum of the equivalent positions in the underlying assets of all financial derivative instruments entered into by fund in accordance with the conversion methodologies for gross exposure calculation, (iii) the exposure resulting from the reinvestment of cash borrowings where applicable and (iv) the exposure resulting from the reinvestment of collateral in relation to efficient portfolio management transactions where applicable, in accordance with the AIFM Directive.
Commitment	The exposure of the fund under the commitment method consists of calculating (i) the sum of the absolute values of all positions (ii) the market value of an equivalent position in the underlying asset or the derivative's notional value, as appropriate, (iii) applying netting and hedging arrangements, (iv) the exposure resulting from the reinvestment of cash borrowings where applicable and (v) positions within repurchase agreements and securities lending or borrowing or other arrangements as applicable, in accordance with the AIFM Directive.

The maximum level of leverage are the following:

Fund	Maximum level of leverage (in % of NAV), using gross method	Maximum level of leverage (in % of NAV), using commitment method
European Senior Loan Fund	200	200
Global Infrastructure Fund	200	200
Global Private Credit Fund	200	200
Global Private Equity Fund	200	200

Risk Management

The AIFM has established and maintains a dedicated risk management function that implements effective risk management policies and procedures in order to identify, measure, manage and monitor on an ongoing basis all risks relevant to funds' investment objectives including in particular market, credit, liquidity, counterparty, operational and all other relevant risks.

Liquidity risk management

The AIFM has established a comprehensive liquidity risk monitoring framework to ensure that all dimensions of the funds' liquidity risks are identified, assessed and monitored on an on-going basis. This includes a periodic review of the liquidity profile of the funds and stress test scenarios in compliance with the circular CSSF 20/752 applying the guidelines of the European Securities and Market Authority (ESMA) on Liquidity Stress Testing in UCITS and AIFs.

How the Funds Use Instruments and Techniques

Legal and regulatory framework

A fund may use the following instruments and techniques consistent with the AIFM Law, CSSF Circular 08/356, the Securities Financing Transactions Regulation (EU) 2015/2365 (SFTR) and any other applicable law and regulation. Each fund's usage must also be consistent with its investment objective and policies and will not increase its risk profile beyond what it otherwise would have been.

What the funds can use derivatives for

A fund may use derivatives for any of the following purposes, consistent with what is described in **"Fund Descriptions"**. When using any derivatives the fund will comply with EMIR and we have adequate procedures and oversight arrangements in place to ensure we comply with EMIR.

Hedging Hedging is taking a market position that is in the opposite direction from the position created by other portfolio investments, for the purpose of reducing or cancelling out exposure to price fluctuations or certain factors that contribute to them.

Currency hedging Typically done using currency forwards. The goal is to hedge against currency risk. A fund may engage in:

- direct hedging (same currency, opposite position)
- cross-hedging (reducing exposure to one currency while increasing exposure to another, the net exposure to the base currency being left unchanged), when it provides an efficient way of gaining the desired exposures
- proxy hedging (taking an opposite position in a different currency that is considered likely to behave similarly to the base currency)
- anticipatory hedging (taking a hedge position in anticipation of an exposure that is anticipated to arise as the result of a planned investment or other event)

Leverage A fund can use techniques to increase its total investment exposure beyond what would be possible through direct investment. Leverage typically increases portfolio volatility.

Efficient portfolio management Reducing risks or costs or generating additional capital or income.

Derivatives the funds can use

A derivative is a financial contract whose value depends on the performance of one of more reference assets (such as a security or basket of securities, an index or an interest rate).

The following are the most common derivatives used by the funds:

- forwards, such as currency forwards (foreign exchange contracts for future delivery at a specified price)
- swaps (contracts where two parties exchange the returns from two different reference assets, such as foreign exchange, inflation swaps or interest rate swaps but NOT including total return, credit default, commodity index, volatility or variance swaps)

These types of derivatives are generally OTC (over the counter, meaning they are in effect private contracts between a fund and a counterparty).

Counterparties to derivatives and techniques

A counterparty must meet the following criteria:

- undergo analysis applicable to the counterparty's intended activity, which can include a review of such aspects as company management, liquidity, profitability, corporate structure, capital adequacy, and asset quality, as well as the regulatory framework; legal status and geographic criteria are typically be considered as well
- be considered creditworthy by the AIFM
- typically have a public credit rating that is at least investment grade

While there are no predetermined legal status or geographical criteria applied in the selection of the counterparties, these elements are typically taken into account in the selection process.

Unless otherwise stated in this prospectus, no counterparty to a derivative held by any fund can serve as an investment manager of that fund or any other fund within the SICAV-FIS, or otherwise have any control or approval over the composition or management of such a fund's investments or transactions or over the assets underlying a derivative. Affiliated counterparties are allowed provided that the transactions are conducted at arm's length.

Collateral

Funds may receive assets from counterparties to reduce counterparty risk in connection with OTC derivatives. If applicable, the AIFM will determine the required level of collateral taking into account the nature and characteristics of transactions, the creditworthiness and identity of counterparties and prevailing market conditions.

Collateral will be valued, on a daily basis, using available market prices and taking into account appropriate discounts which will be determined by the AIFM for each asset class based on its haircut policy.

A fund may transfer or pledge to any counterparty cash collateral received for the benefit of the fund.

A fund may sell, re-invest or pledge non-cash collateral up to the maximum usage (% of total assets) permitted for repos and reverse repos disclosed in **"Fund Descriptions"**.

Risks

The risks associated with above-mentioned instruments and techniques are described in **"Risk Descriptions"**.

Investing in the Funds

Share Classes

Within each fund, the SICAV-FIS can create and issue share classes. All share classes within a fund invest commonly in the same portfolio of securities but may have different characteristics and investor eligibility requirements.

Each share class is identified first by a core share class label (described in the table below) and then by any applicable suffixes and currency abbreviation. Within any given share class of any fund, all shares have equal rights of ownership. The information below describes all currently existing core share classes and suffixes.

Available classes

While any fund is permitted to issue any core share class, and to configure it with any combination of the features described below, in practice only certain configurations are available in any given fund. Also, some funds or share classes that are available in certain jurisdictions may not be available in others. For the most current information on available share classes, go to nordea.lu.

Core share class characteristics

Core Class	Available to	Distributor Commission or Retrocession Available	AIFM Requirements	Minimum initial investment amount*	Minimum subsequent investment amount*
W	Well-informed investors at the discretion of the AIFM	Yes	None	EUR 100,000 or the equivalent amount in other currencies**	EUR 10,000 or the equivalent amount in other currencies**
U	Well-informed investors at the discretion of the AIFM	No	None	EUR 100,000 or the equivalent amount in other currencies**	EUR 10,000 or the equivalent amount in other currencies**
F	Well-informed Investors at the discretion of the AIFM. Only available to Shareholders in Global Private Credit Fund.	No	None	EUR 100,000 or the equivalent amount in other currencies**	EUR 10,000 or the equivalent amount in other currencies**
T	Well-Informed Investors subscribing through Nordea Group, at the discretion of the AIFM.	Yes	None	EUR 10,000 or the equivalent amount in other currencies**	EUR 10,000 or the equivalent amount in other currencies**
K	Well-Informed Investors subscribing through intermediaries, at the discretion of the AIFM.	Yes	Written agreement	EUR 10,000 or the equivalent amount in other currencies**	EUR 10,000 or the equivalent amount in other currencies**
O	Well-Informed Investors subscribing through intermediaries, at the discretion of the AIFM.	No	None	EUR 10,000 or the equivalent amount in other currencies**	EUR 10,000 or the equivalent amount in other currencies**
I	Institutional investors.	Yes	None	EUR 1,000,000 or the equivalent amount in other currencies**	EUR 100,000 or the equivalent amount in other currencies**
R	Institutional investors. Only available to Shareholders in the Global Private Equity Fund.	Yes	None	EUR 1,000,000 or the equivalent amount in other currencies**	EUR 100,000 or the equivalent amount in other currencies**
X	Institutional investors who meet the terms of the written agreement, who agree to hold the shares in custody at the registered office of the AIFM in their own name and who have an arrangement where part or all of the fees normally charged to the SICAV-FIS/Share Class are collected directly from the investor by the AIFM; at the discretion of the AIFM.	No	Written agreement before investment	EUR 5,000,000 or the equivalent amount in other currencies**	EUR 500,000 or the equivalent amount in other currencies**
Y	Specialised Investment Funds (governed by the SIF Law) and UCIs that have appointed Nordea Investment Funds S.A. as or management company or alternative investment fund manager, at the discretion of the AIFM. UCIs that have appointed a Nordea entity as management company or alternative Investment fund manager; at the discretion of the AIFM. Other entities belonging to the Nordea Group for strategic purposes; at the discretion of the AIFM.	No	None	EUR 100,000 or the equivalent amount in other currencies**	EUR 10,000 or the equivalent amount in other currencies**

* As an exception to the table above, the minimum subsequent investment amounts for the European Senior Loan Fund are identical to the minimum initial investment amounts.

** For SEK and NOK the conversion rate is calculated as 1 EUR = 10 SEK/NOK.

Share class supplemental labels

Core share classes are issued either as distributing shares or accumulating shares. Additionally, hedging features may be added. Suffixes are added to the core share class label to indicate these characteristics. Currency codes are added as a suffix on share classes to indicate the share class currency.

Accumulating share classes Accumulating share classes are not entitled to any distribution payments. Holders of such share classes benefit from the capital appreciation resulting from the reinvestment of any income earned by the share classes. Accumulating Share Classes give priority to capital growth and are not entitled to any dividend distribution. Classes of Accumulating Share Classes are characterised by the prefix "B".

Distributing share classes Distributing share classes are entitled to payment of a dividend, subject to approval by a vote of shareholders at the general meeting or by the SICAV-FIS, as relevant. Dividends may be paid out of capital and/or may reduce the NAV of the relevant share class. Dividends paid out of capital could be taxed as income in certain jurisdictions.

The SICAV-FIS currently offers the following categories of distributing shares:

Share classes with suffix "A"
- eligible for annual distributions
- dividends can be re-invested upon request

Share classes with suffix "J"
- available at the discretion of the AIFM

Currency hedged share classes (suffix "H")

Currency hedged shares seek to hedge the NAV, expressed in the fund's base currency, to the currency of the share class. The SICAV-FIS may use derivatives such as currency forwards (deliverable or non-deliverable) to perform the currency hedging, at the cost of the shareholders in the respective share classes. Costs include direct or indirect charges from the counterparties, as well as the impact of the interest rate differentials of the currencies exchanged in the currency forward contract. In practice it is unlikely that the hedging will eliminate 100% of the fluctuations in foreign exchange rates. For more on currency hedging, see **"How the Funds Use Instruments and Techniques"**.

Currency codes Each share class carries the standard three-letter code for the currency in which it is denominated. A share class may be issued in any currency as decided by the SICAV-FIS.

Share Class Fees

Charges taken from the fund over a year

These fees cover fund operating costs, including management, administration, taxe d'abonnement. These fees are accrued on a daily basis on the total assets in the relevant share classes and funds and deducted from fund assets quarterly, and therefore reduce the performance of your investment.

These fees are the same for all shareholders of a given fund and share class.

Management fee These fees, payable out of the assets of the relevant funds, are due to the AIFM. Management fees for X shares are not taken from the fund but are paid by investors in this type of shares. Management fees for Y shares are zero.

The annual management fees for all funds and classes are listed below:

	Management Fee								
Fund	**W**	**U**	**F**	**T**	**K**	**O**	**I**	**R**	**X and Y**
European Senior Loan Fund	0.95%	0.76%	n/a	1.25%	n/a	1.00%	0.70%	n/a	Nil
Global Infrastructure Fund	1.45%	1.15%	n/a	1.65%	1.85%	1.30%	0.85%	n/a	Nil
Global Private Credit Fund	1.05%	0.84%	0.75%	1.35%	1.50%	1.05%	0.70%	0.50%	Nil
Global Private Equity Fund	1.60%	1.28%	n/a	1.90%	2.00%	1.50%	1.00%	n/a	Nil

Depositary fee An annual fee of up to 0.02% of the net assets of the fund, plus any VAT if applicable, is levied on the net assets of the fund in favour of the Depositary. The fee is payable quarterly.

Administration fee This fee is paid to the AIFM in its capacity as administrative agent for the SICAV-FIS. The maximum administration fee is 0.05% a year.

Performance fee No performance fee is applicable to any of the funds. Certain entities in which a fund invests may pay performance fees to their respective investment managers.

Accounting agent fee An annual fee of up to 0.05% of the net assets of the fund, plus any VAT if applicable, is levied on the net assets of the fund in favour of the Accounting agent. The fee is payable quarterly.

Subscription fee Up to 3% of the NAV of the shares being subscribed may be charged to the investor in favour of the AIFM, the fund and/or the respective distributor(s) and/or sales agent(s).

Redemption fee Up to 3% of the NAV of the shares being redeemed may be charged to the shareholders in favour of the fund.

How fund expenses are applied and used

All expenses that are paid from funds' total assets are reflected in NAV calculations, and the actual amounts paid are documented in the SICAV-FIS's annual reports. Expenses are calculated and accrued each valuation day for each fund and share class and paid quarterly in arrears.

All fees paid by the SICAV-FIS are subject to VAT where applicable. Each fund and share class pays all costs it incurs directly and also pays its pro rata share (based on its total net asset value) of costs not attributable to a specific fund or share class.

Expenses not included in any of the above
- all taxes payable on the assets and / or income chargeable to the SICAV-FIS, except for the taxe d'abonnement
- depositary transaction fees

- investment-related costs and other transaction-related fees, such as ordinary brokerage fees and commissions, bank charges, stamp duties or similar levies
- all fees of the auditor and the legal adviser
- all expenses connected with publications and the supply of information to shareholders, in particular the cost of printing, the distribution of the financial reports as well as any prospectuses
- all expenses involved in registering and maintaining the registration of the SICAV-FIS with all governmental agencies and stock exchanges
- any regulatory fees and regulatory compliance fees
- any advertising costs and expenses other than those specified above that the AIFM determines to be directly related to the offer or distribution of shares
- all other expenses chargeable to the SICAV such as operating systems used in the interest of the fund
- certain expenses associated with accessing and using research platform

All expenses connected with its establishment as well as the fees due to AIFM, the Depositary, the Accounting Agent, the AIFM in its capacity as transfer and registrar agent, to any other service provider appointed as well as other reasonable costs and expenses which, in the good faith judgement of the AIFM, are incurred in the operation of the SICAV-FIS or the offering of shares shall be borne by the SICAV-FIS. For information on the maximum amount of expenses charged to the SICAV-FIS, please consult the latest available annual report. The expenses in connection with the establishment of the SICAV-FIS, will be amortised over a period of the first five years. Each fund shall amortise its own expenses of establishment over a period of five years as of the date of its creation.

Share Class Policies

We issue shares in registered form only. With these shares, the owner's name is recorded in the SICAV-FIS's register of shareholders and the owner receives a confirmation of subscription.

Other policies

Shares are issued to one one-thousandth of a share (four decimal places). Fractional shares receive their pro rata portion of any dividends, reinvestments and liquidation proceeds.

Shares carry no preferential or pre-emptive rights. No fund is required to give existing shareholders any special rights or terms for subscribing for new shares. All shares must be fully paid up.

Subscribing, Switching, Redeeming and Transferring Shares

You can place transaction orders through your intermediary or an authorised distributor or through the transfer agent if you are an investor registered in the shareholder register of the SICAV-FIS.

Information that applies to all transactions except transfers

Dealing requests You can submit requests to subscribe, switch or redeem shares.

When placing any request, you must include all necessary identifying information, including the account number and the name and address of the accountholder exactly as they appear on the account. Your request must indicate the fund, share class, ISIN number, reference currency, transaction size (currency; number of shares or invested amount) and type of transaction (purchasing, switching or redeeming). Any requests that we consider to be incomplete or unclear may be delayed or rejected. We cannot be responsible for any losses or missed opportunities arising from unclear requests.

Once you have placed a request, you can withdraw it only prior to the cut-off time on the same day. At or after cut-off time, any request that is accepted will be considered final and irrevocable.

No request will be accepted or processed in any way that is inconsistent with this prospectus.

Cut-off times and dealing schedule Unless specified otherwise in **"Fund Descriptions"**, the funds can be subscribed and redeemed on a monthly basis as laid down in this section. Dealing requests received by the transfer agent before cut-off 15:30 on a valuation day will be processed on the valuation day subsequent to the applicable notification period below. Any dealing request received at or after the cut-off time will be processed on the next applicable cut-off. The AIFM may decide to waive or reduce the processing time and thus process the dealing request quicker.

Note that the NAV at which a dealing request will be processed will not be known at the time the request is placed.

Dealing schedule

Cut-off	Valuation day	NAV release	Settlement	
			Subscriptions	Redemptions
15:30 CET on valuation day	The 19th calendar day, or any such previous business day if the 19th is not a business day	Six business days after the valuation day, and at the latest on the last business day of each month	Payments of subscriptions should be received by the AIFM in its capacity as transfer and registrar agent no later than 9 business days after the relevant valuation day.	Payment of redemptions proceeds shall be made in principle no later than 20 business days following the relevant valuation day.

Notification periods

Subscription	Redemption
1 month	3 months

Pricing Shares are priced at the NAV for the relevant share class and are quoted (and processed) in the currency of that share class. Except for initial offering periods, during which the price is the initial offer price, the share price for a transaction will be the NAV calculated for the applicable dealing day.

Currencies We accept and make payments exclusively in the share class currency, except in a share class whose currency is a non-deliverable currency. In such cases, payments will be made in the fund's base currency.

Fees charged by intermediaries Your local intermediary may impose their own fees as part of any contractual arrangements that they may have with an investor. Such fees are independent of the SICAV-FIS, the depositary and the AIFM, are deducted from your transaction amounts and are generally kept by the intermediary. Consult your financial advisor or local intermediary to learn what your actual fee rate would be for a given investment.

Late or missing payments to shareholders The payment of a dividend or redemption proceeds to any shareholder may be delayed, reduced, or withheld if required by foreign exchange rules, other rules imposed by the shareholder's home jurisdiction, or for other reasons. In such cases we cannot accept responsibility, nor do we pay interest on amounts delayed.

Changes to account information You must promptly inform us of any changes in personal or bank information, particularly any information that might affect your eligibility for any share class. We will require adequate proof of authenticity for any request to change the bank account associated with your fund investment.

Exceptions and unusual circumstances The language in this **"Investing in the Funds"** section, up until **"Rights We Reserve"**, describes generally applicable terms and procedures. See **"Rights We Reserve" on page 30** or descriptions of terms and procedures that may apply under certain unusual circumstances or at the discretion of the SICAV-FIS.

Subscribing for shares Also see **"Information that applies to all transactions except transfers"** above.

To make an initial investment, submit a completed application form and all account opening documentation (such as all required tax and anti-money laundering information). However, the original documents must also be send via postal letter. Note that some distributors may have their own account opening requirements. Once an account has been opened, you can place your initial and any additional orders.

Payment must be sent via bank transfer (net of any bank charges) in the currency denomination of the share class(es) you want to subscribe for or, if that currency is non-deliverable, in the base currency of the fund. We do not accept cheques or third-party payments.

Shares will be allocated to your account as soon as your order has been processed. However, they cannot be sold, switched or redeemed until your payment is received. If we do not receive good payment on time for the full amount of your subscription, we may cancel the subscription and seek full payment of our costs and any investment losses. We may do this by taking action against you and your intermediaries or by deducting the amount owed from any assets of yours we hold, including fund shares, payments you are due to receive from us, or a late-arriving or insufficient subscription payment.

Switching shares Also see **"Information that applies to all transactions except transfers"** above.

You can switch shares of any fund into the into a different share class within the same fund; in this case, you must indicate your desired share class on your request. All switches are subject to the following conditions:

- you must meet all eligibility and minimum initial investment requirements for the share class into which you are requesting to switch
- for any switches into shares with a higher subscription fee than what you paid, you may be charged the difference
- both share classes involved must be denominated in the same currency
- the switch must not violate any restrictions stated in this prospectus (including in **"Fund Descriptions"**)
- the switch might not be accepted until any previous transaction involving the shares to be switched has been fully settled.

We will let you know if any switch you request is not permitted by this prospectus.

We process all switches on a value-for-value basis, using the NAVs of the two investments that are in effect as at the time we process the switch.

Because a switch is considered two separate transactions (a simultaneous redemption and subscription) it may create tax or other implications. The subscription and redemption components of a switch are subject to all terms of each respective transaction.

Redeeming shares Also see **"Information that applies to all transactions except transfers"** above.

Redemption requests that are for more than the value of the account (at the time the redemption is processed) will be considered as "not in good order" and rejected.

The SICAV-FIS does not pay interest on redemption proceeds whose arrival is delayed for reasons beyond its control.

Note that any redemption proceeds will only be paid out once all investor documentation has been received, including any requested in the past that was not adequately provided.

We pay redemption proceeds only to investors identified in the SICAV-FIS's register of shareholders. Payment is made by bank transfer, using the bank account details we have on file for your account. The account to be paid to must always be in the name of the registered shareholder(s). If any required information is missing, the payment will be held back until such information has been provided.

All payments are made at the shareholder's expense and risk.

Shareholders should note that any redemption of shares will take place at a price that may be higher or lower than the original subscription amount.

The Redemption of shares of any fund shall be suspended when the calculation of the Net Asset Value thereof is suspended.

Lock-up period Shareholders may not redeem their shares during the time period specified below, calculated from the valuation day during which the subscription was processed.

Fund	Holding period
Global Infrastructure Fund	3 years
Global Private Credit Fund	1 year
Global Private Equity Fund	3 years

Transferring shares

In order to transfer ownership of shares to another investor you must submit a properly executed transfer instruction. Please contact your intermediary or an authorised distributor, or the transfer agent if you are an institutional investor who has invested directly through the transfer agent, to ensure that you complete the right documentation.

The receiving investor is subject to all applicable holding restrictions, eligibility and documentation requirements. Please see **"Who can invest in these funds"**, **"Investing in the Funds"** and **"Measures to prevent money laundering and financing of terrorism"**.

Liquidity Management Tools

As an exception and not on a systematic basis, the board or the AIFM may in its sole discretion decide to activate any of the below liquidity management tools if reasonably assessed to be in the best interest of the fund.

Anti-dilution levy The board or the AIFM may decide to charge an anti-dilution levy on subscriptions, redemptions and switches in favour of the fund. The board or the AIFM will decide on the appropriate levels of such levy depending on market considerations to compensate for the costs generated by the purchase and sale of fund's assets caused by subscriptions and redemptions. When applicable, anti-dilution levy should be charged to redeeming investors in case the number of redemptions exceed the number of subscriptions, or vice-versa, to subscribing investors in case the number of subscriptions exceed the number of redemptions, resulting in a change in the net assets of the fund.

In the event that the fund would need to make sales of close-ended funds on the secondary market at a spread to meet redemption requests, anti-dilution levy should reflect the expected or actual discount relative to net asset values of prices obtained through secondary sales under the then prevailing market conditions. Investors should note that the costs of selling close-ended funds on the secondary market are significantly higher than those normally associated with equities and bonds, and may exceed 10%.

Investors may obtain from the AIFM the level of the anti-dilution levy upon request.

Extend notification period for redemption requests The board or the AIFM may decide, to temporarily extend the notification period for redemption requests up to a period of six months.

Such extension of the notification period for redemption requests will be promptly disclosed to affected investors.

Implement restrictions on subscriptions The board or the AIFM may decide to reject, defer or reduce, in whole or in part, any subscription request at any time in its full discretion. In particular if the aggregate subscription requests during the last 12 months represent more than 25% of the shares in issue of a fund at the end of the preceding month or in case of subscriptions leading to a holding larger than 10%, of a fund the board or the AIFM may decide to defer excess subscription requests to be processed pro rata the succeeding valuation days where the limits are not exceeded. Affected investors will be informed and will have the right to withdraw the deferred part of the subscription.

Implement restrictions on redemptions Although redemptions are expected to be offered on a monthly basis, the board or the AIFM may decide to limit the redemptions to 5 % of the NAV of a fund on a rolling three month basis. Excess redemption requests will be deferred and processed pro-rata on equal terms with new redemption requests for the subsequent calculation of the 5% over a 3 month rolling period.

In exceptional circumstances, the board may decide to temporarily lower the limit for activation of the gating procedure for a period of maximum two years.

In exceptional circumstances, the board or the AIFM may decide to not accept redemptions in a fund for a period of up to 12 months.

Such implementation of restrictions on redemptions will be promptly disclosed to affected investors.

No interest will be paid on deferred redemptions.

Postponement of redemption settlement date

Although settlement of redemption proceeds is expected to occur within 20 business days after the relevant valuation day, the board or the AIFM may decide to temporarily extend the settlement up to 60 business days after the valuation day.

Such postponement of redemption settlement date will be promptly disclosed to affected investors.

Re-organisation of classes of shares

In the event that, for any reason, the board determines that (i) the net asset value of any class of shares has decreased to, or has not reached, the minimum level for that class of shares to be managed and/or administered in an efficient manner, or (ii) changes in the legal, economic or political environment would justify such reorganization of classes of shares, or (iii) a product rationalisation or any other reason would justify such reorganization of classes of shares, the board of directors may decide to re-allocate the assets and liabilities of that class to those of one or several other classes within the SICAV-FIS and to re-designate the shares of the class(es) concerned as shares of such other share class(es) (following a split or consolidation, if necessary, and the payment to shareholders of the amount corresponding to any fractional entitlement). The shareholder of the class of shares concerned will be informed of the reorganisation by way of a notice and/or in any other way as required or permitted by applicable laws and regulations.

How We Calculate NAV

Timing and formula

Unless indicated otherwise in **"Fund Descriptions"**, we calculate the NAV for each share class of each fund within six business days following each valuation day, based on the latest market prices received on the valuation day using this general formula:

$$\frac{\text{(assets – liabilities)}}{\text{number of outstanding shares}} = \text{NAV}$$

Each NAV per share is rounded to four decimal places in the base currency of the fund and, where applicable, exchanged to the currency in which each share class is denominated.

All NAVs per share whose pricing involves currency conversion of an underlying NAV are calculated using market exchange rates in effect at the time the NAV calculation process starts.

The issue, switch and redemption amounts are rounded up or down to the smallest commonly used fractional currency amount.

Appropriate provisions will be made to account for the costs, charges and fees attributable to each fund and class as well as accrued income on investments.

The NAV per Share will be determined based on the information available to the AIFM and the Accounting Agent when calculating the net asset value as of the applicable NAV Valuation day and, as such, may not reflect information subsequently received in connection with the preparation of any financial statements delivered to the Shareholders. As a result, the Subscription price and Redemption price for a given Valuation day may differ from the ultimate determination made regarding the value of the fund's assets as of such Valuation day that is made subsequent to the day when the net asset value was calculated. The fund will not retroactively adjust any Subscription price or Redemption price to reflect amounts subsequently reported in any financial statements.

NAV calculation error Any NAV that experiences a calculation error will be addressed according to the principles set out in the CSSF Circular 24/856. In case a fund invests in other funds, the materiality thresholds will be determined separately by the AIFM by reference to the investment policy laid down in the prospectus, taking into account the liquidity, volatility and valuation uncertainty of the underlying assets. Updated information on such thresholds is available upon request and free of charge at the registered office of the AIFM. When subscribing through financial intermediaries, it may not always be possible to be indemnified in case of NAV calculations errors and/or non-compliance with investment rules and/or other errors at the level of the fund. Investors are advised to seek advice in relation to their rights which may be negatively impacted.

Asset Valuations

The AIFM has established valuation principles providing for a proper and independent valuation of the assets of the funds. The main methods to determine fair value of an asset are mark-to-market and mark-to-model. Depending on the asset class a market quote or traded price from an exchange or a broker is the first priority. Should these prices not be available indicative broker prices, pricing services or models taking into consideration the relevant observable input will be used. Where valuation models are used these are reviewed periodically.

The valuation principles define the appropriate valuation process for each asset class to ensure consistent application of principles for the same type of securities. In case the AIFM is forced to deviate from standard principles, specific processes will be established by decision of the AIFM using other generally recognised, auditable valuation principles. Such specific decision might be required in cases where exceptional market or issue/issuer specific circumstances apply. The AIFM may furthermore adjust the value of any asset if the AIFM determines that such adjustment is required to reflect the fair value thereof.

In general, we determine the value of each fund's assets as follows:

- **Cash in hand or on deposit, bills and demand notes and accounts receivable, prepaid expenses, cash dividends and interest declared or accrued but not yet received** valued at full value, plus any accrued interest.
- **Fixed income instruments** valued at the most recent prices received from pricing services. Some bond instruments with short maturities might be valued using a mark-to-model, discounting the cashflow with appropriate yield curves and credit spreads.
- **Listed equities** valued based on the latest observable market prices retrieved at the valuation point. For markets where foreign and domestic shares co-exist, suspended shares or other exotic equities, specific valuation procedure must be in place. Liquid listed derivatives - valued based on market quotes.
- **OTC derivatives** valued based on market prices developed through standard vendor valuation models that draw on objective market data from proven data vendors.
- **Shares or units of UCITS or other open-ended UCIs** valued based on the latest traded price (ETF's), latest official net asset value, or a price provided by an approved pricing source available at the valuation point.
- **Currencies** valued at the market foreign exchange rate (applies to currencies held as assets, to hedging positions, and when translating values of securities denominated in other currencies into the base currency of the fund).
- **Listed investment vehicles (including private equity, infrastructure or private credit vehicles)** valued according to their market value using the latest available closing price at the day of the NAV valuation day.
- **Non-listed close-ended investment vehicles** Initially valued at cost and thereafter by reference to the most recent capital account statement reported by the manager or trustee, adjusted by adding capital calls paid and subtracting distributions received since the valuation date of the capital account statement. If no capital account statement has been received since the previous NAV valuation day, the previous months capital account statement is used, but adjusted by adding the capital calls made by the relevant fund during the month and subtracting the corresponding book value of the distributions received from the relevant fund. If differences arise between book value and realised value such differences are treated as realised gains or losses. Moreover, if the fund

is denominated in a currency different from the fund's base currency, the currency effects on both the prior month's NAV as well as the cash paid in during the month should be included in the calculation. If a fund has issued a capital call before a NAV valuation day but the cash flow occurs after NAV valuation day, the cash flow shall not be taken into consideration when calculating the NAV. If a fund has issued a distribution notice before a NAV valuation day but the cash flow occurs after valuation day, any differences between book value and realized value of the realized investment announced in the distribution notice shall be taken into account and treated as a realized gain or loss.

- **Co-investments** represent minority investments in operating companies alongside another investment fund, whether they are held through a single-purpose private investment fund or directly, and for which there is no liquid public market, are valued at fair value, estimated with care and good faith, in line with fair valuation principles. When co-investments in operating companies are held indirectly through an intermediary vehicle, they are valued by reference to the most recent capital account statement provided by the manager of such vehicle (Refer to section related to Non-listed close-ended investment vehicles). If co-investments in operating companies are held directly (i.e. without the set-up of an intermediary vehicle), they are valued by reference to the value of these operating companies as most recently reported to the fund by the private equity fund manager.
- **Fixed term deposits** valued at their nominal value plus accrued interest. Fixed term deposits with an original term of more than 30 days can be valued at their yield adjusted price if an arrangement between the Fund and the bank, with which the fixed term deposit is invested has been concluded including that the fixed term deposits are terminable at any time and the yield adjusted price corresponds to the realisation value.
- **Non-listed securities or financial instruments** valued based on their probable realisation value, estimated with care and good faith, in line with fair valuation principles.
- **Any other assets for which current market quotations are not readily available** valued in good faith at a prudent estimate of their probable sale price.
- **All other assets** are valued on the basis of their probable sale price.

Taxes

Taxes paid from fund assets

The SICAV-FIS is subject to a taxe d'abonnement (subscription tax) at 0.01%.

This tax is calculated and payable quarterly, on the aggregate net asset value of the outstanding shares of the SICAV-FIS. The SICAV-FIS is not currently subject to any Luxembourg stamp tax, withholding tax, municipal business tax, net worth tax, or taxes on income, profits or capital gains.

To the extent that any country in which a fund invests imposes taxes on income or gains earned in that country, most of these taxes will be deducted before the fund receives its income or proceeds. Some of these taxes may be recoverable. The fund might also have to pay other taxes on its investments. See also **"Taxation risk"** in the **"Risk Descriptions"** section.

While the above tax information is accurate to the best of the board's knowledge, it is possible that a tax authority may modify existing taxes or impose new ones (including retroactive taxes). Investors are advised to consult their tax advisors.

Taxes you are responsible for paying

The following is summary information and is provided for general reference only. Investors should consult their own tax advisors.

Taxes in your country of tax residence Distributions of dividends interest, as well as gains realized in the redemption of fund shares, are generally taxable to a beneficial owner in any jurisdiction in which they are a tax resident.

International tax agreements Several international tax agreements require the SICAV-FIS to report certain information about fund shareholders to the Luxembourg tax authorities every year, and for those authorities to forward that information to other countries, as follows:

- **Directive on Administrative Cooperation (DAC) and Common Reporting Standards (CRS)** Collected: financial account information, such as interest and dividend payments, capital gains, and account balances. Forwarded to: the home countries of any shareholder located in the EU (DAC) or in OECD countries that have adopted CRS standards.
- **US Foreign Account Tax Compliance Act (FATCA)** Collected: information on direct and indirect ownership of non-US accounts or entities by certain US Persons. Forwarded to: US Internal Revenue Service (IRS).

Any shareholder who fails to comply with the SICAV-FIS's information or documentation requests may be subject to penalties from their jurisdiction of residence and may be held liable for any penalties imposed on the SICAV-FIS that are attributable to the shareholder's failure to provide the documentation. However, shareholders should be aware that such a violation on the part of another shareholder could reduce the value of all other shareholders' investments, and that it is unlikely the SICAV-FIS will be able to recover the amount of such losses.

While the AIFM will make good-faith efforts to ensure compliance with all applicable obligations of tax law, the SICAV-FIS cannot guarantee that it will be exempt from withholding requirements or that it will provide all necessary information for shareholders to comply with their tax reporting requirements.

German Investment Tax Act If the prospectus or the articles indicate that a fund intends to continuously invest a certain level of its assets in equities (as at the date of this prospectus, the levels are more than 50% to qualify as "equity funds" and at least 25% to qualify as "mixed funds"), German taxable investors may qualify for a full or a partial tax exemption for investments in that fund.

Measures to Prevent Improper and Illegal Behaviour

Measures to prevent money laundering and financing of terrorism

We (meaning the SICAV-FIS, the AIFM and the Administrative Agent) will at all times comply with any obligations imposed by all applicable laws, regulations and circulars with respect to the prevention of money laundering and financing of terrorism, and, in particular, with the Luxembourg Law of 12 November 2004 (as amended from time to time) and the CSSF Regulation 12-02 (as amended by the CSSF Regulation 20-05).

Before opening an account and on an ongoing basis, investors will be required to provide documentary evidence of their identity (as well as the identities of any beneficial owners), their address, and the source of the funds to be invested. Additional documentation may be required from time to time pursuant to legal, regulatory and other requirements.

Where the investor is purchasing shares on behalf of, or as an intermediary for, one or more of its clients, we will apply enhanced due diligence measures, which includes the requirement to obtain a representation that the intermediary has collected and maintains recorded evidence for its end investors.

We will delay or deny the opening of your account and any associated transaction requests and payments (including switches, redemptions and transfers) until we receive, and judge to be satisfactory, all requested documents. We will not be liable for any resulting costs, losses, or lost interest or investment opportunities. In addition, we reserve the right to terminate the business relationship with immediate effect after reasonable attempts to contact the investor to obtain the missing or updated documentation in line with applicable laws and regulations, which will prevent us from fulfilling our anti-money laundering and counter-terrorism financing obligations.

We conduct ongoing transaction monitoring to ensure that transactions are consistent with our knowledge of your identity and our business relationship.

We perform ongoing due diligence on the SICAV-FIS's assets in accordance with applicable laws, regulations and circulars.

For more information on the documentation required to open an account, contact us (see below).

Market timing and excessive trading

The funds are in general designed to be long-term investments and not vehicles for frequent trading or for market timing (defined as short-term trading intended to profit from arbitrage opportunities arising from deficiencies in NAV calculations or from timing differences between market openings and NAV calculations).

These types of trading are not acceptable as they may disrupt portfolio management and drive up fund expenses, to the detriment of other shareholders. We may therefore take various measures to protect shareholder interests, including rejecting, suspending or cancelling any request we believe represents excessive trading or market timing. We may also forcibly redeem your investment, at your sole cost and risk, if we believe you have engaged in excessive trading or market timing.

Late trading

Any request to subscribe for, switch or redeem shares that arrives at or after the cut-off time for a given NAV will not be processed at that NAV. The board or the AIFM may however decide to approve the request if it, in the view of the board or the AIFM, is in the interest of the fund.

Privacy of Personal Data

We require personal data from potential investors and shareholders for various purposes, such as to maintain the SICAV-FIS's register of shareholders, process requests, provide shareholder services, guard against unauthorised account access, conduct statistical analyses, provide you with information on other products and services, and comply with various laws and regulations.

In compliance with the GDPR we (here meaning the SICAV-FIS, the AIFM or any other service provider appointed by the AIFM) may do any of the following with personal data:

- gather, store, modify, process and use it in physical or electronic form (including making recordings of telephone calls to or from potential investors, shareholders or their representatives)
- share it with external processing centres, the transfer or payment agents, or other third parties as necessary for the purposes we have described; these third parties, may or may not be Nordea Bank Group entities, and some may be located in jurisdictions with different or lesser information protection standards than Luxembourg
- use it for aggregate data and statistical purposes, and in connection with sending you marketing messages about other products and services offered by a NAM entity
- share it as required by applicable law or regulation

We take reasonable measures to ensure the accuracy and confidentiality of all personal data, and do not use or disclose it beyond what is described in this section without the potential investor's or shareholder's consent, unless we are required to do so. At the same time, neither the SICAV-FIS nor any Nordea Group entity accepts liability for personal data obtained by unauthorised third parties, except in the case of gross negligence or serious misconduct by the SICAV-FIS, a Nordea Group entity or any of their employees or officers. Personal data is held only as long as needed or as required by law, whichever is longer.

Subject to applicable law, you have the right to review, correct or request deletion of the personal data we and any service providers have on file for you at any time, free of charge. Note that the deletion of certain data could prevent us from providing services to you. Information on our Data Privacy policy can be found on nordea.lu.

Rights We Reserve

Within the limits of law and the articles, the board and/or the AIFM, as applicable, reserve the right to do any of the following at any time:

- **Reject or cancel any application to open an account or any request to subscribe for shares or transfer shares** We can reject the entire amount or part of it. If a request to subscribe for shares is rejected, monies will be returned at the purchaser's risk within 7 business days, without interest and minus any incidental expenses.
- **Declare additional dividends** or change (temporarily or permanently) the method used for calculating dividends, within the limits of law and the articles.
- **Require shareholders to prove beneficial ownership of shares or eligibility to hold shares, or compel an ineligible shareholder to relinquish ownership** If the board and or the AIFM believe that shares are being held in whole or in part by or for an owner who is, or appears likely to become, ineligible to own those shares, we can request certain information from the owner to establish eligibility or confirm beneficial ownership. If no information is provided, or if we consider the information provided to be unsatisfactory, we may either request that the owner redeem the shares and provide evidence of having done so, or we may redeem the shares without the owner's consent, on the next dealing day following notice. We may take these steps to ensure the SICAV-FIS's compliance with law and regulation, to avoid the adverse financial consequences for the SICAV-FIS (such as tax charges), or for any other reason. The SICAV-FIS will not be held liable for any gain or loss associated with these redemptions.
- **Compulsory switch shareholder shares** The board may decide to compulsorily switch shares of any share class to any other shares of another share class within the same fund. Such decision shall be taken with due regard to shareholders' best interests. Concerned shareholders will be informed of the contemplated compulsory switch, indicating the reasons as well as the applicable process for the intended switch, through a one month's advance notice, during which they will be able to redeem or switch their shares free of any redemption or switching charges. At the end of the notice period, shareholders who still own shares that are being switched and who have not expressly indicated their willingness to redeem their shares will be bound by the decision relating to the compulsory switch.
- **Temporarily suspend the calculation of NAVs and transactions in a fund's shares** when, at the sole discretion of the board or the AIFM, a suspension would be consistent with the interests of shareholders and any of the following is true:
  - a certain portion (as defined by the board) of the fund's assets cannot be traded due to a full or partial closure or other restrictions or suspensions on a relevant market
  - a disruption of communication systems or other emergency has made it impractical to reliably value or to trade fund assets
  - an emergency exists that makes it impracticable to value or liquidate assets
  - the fund is a feeder fund and its master fund has suspended its NAV calculations or share transactions
  - for any other reason any portfolio investments cannot be properly or accurately valued
  - the fund is unable to repatriate monies needed to pay out redemption proceeds, or is unable to exchange monies needed for operations or redemptions at what the board considers to be a normal currency exchange rate
  - the fund or SICAV-FIS is being liquidated or merged, or notice has been given of a shareholder meeting at which it will be decided whether or not to liquidate or merge
  - any other circumstances exist under which the law allows for a suspension
  - a suspension could apply to any share class and fund, or to all, and to any type of request (subscribe, switch, redeem)
  - if your order is delayed in processing because of a suspension, you will be notified promptly in writing
  - all requests whose processing has been delayed because of a suspension of transactions will be executed at the next NAV to be calculated.
- **Soft or hard close a fund or share class to further investment** — temporarily or indefinitely, immediately or at a future date, and in all cases without notice, when the AIFM believes it is in the best interests of shareholders (such as when a fund has reached the size where further growth appears likely to be detrimental to performance). A closure may apply only to new investors (soft closure) or to further investments from existing shareholders as well (hard closure).
- **Accept securities as payment for shares, or fulfil redemption payments with securities (in-kind payments)** If you wish to request a subscription or redemption in kind, you must get advance approval from the Board of Directors of the SICAV-FIS or the AIFM. Except for cases where exemption may be granted, the value of a subscription or redemption in kind will be certified by an auditor's report. You must pay all costs associated with the in-kind nature of the transaction (such as any required auditors' report).

Any securities accepted as a payment in kind for a subscription of shares must be consistent with the fund's investment policy, and acceptance of these securities must not affect the fund's compliance with the risk spreading requirement within the meaning of CSSF Circular 25/901 and the AIFM Law.

If you receive approval for an in-kind redemption, we will seek to provide you with a selection of securities that closely or fully matches the overall composition of the fund's portfolio at the time the transaction is processed.

The board may request that you accept securities instead of cash in fulfilment of part or all of a redemption request. If you agree to this, the SICAV-FIS may provide an independent valuation report from its auditor and other documentation.

Reduce or waive any stated sales charge, or minimum initial investment amount, for any share class, fund, investor, or request, so long as it is consistent with equal treatment of shareholders

Notices and Publications

The following table shows which material (in its most recent version) is made available through which channels.

KEY Sent to all shareholders at the address in the shareholder register, either physically, electronically, or as an e-mailed link, subject to investor consent (where required).

Media Published, as required by law or as determined by the board, in newspapers or other media (such as newspapers in Luxembourg and other countries where shares are available, or electronic platforms such as Bloomberg or Fundsquare, where daily NAVs are published), as well as the Recueil Electronique des Sociétés et Associations.

Online Posted online on nordea.lu and in some jurisdictions on local Nordea websites.

Office Available free of charge upon request from the registered offices of the SICAV-FIS and the AIFM, and available for inspection at those offices. Many items are also available free on request from the central administration, depositary and local representatives.

Shareholder notices include convening notice of shareholder meetings (the annual general meeting and any extraordinary meetings) as well as notices of prospectus changes, suspension of trading in shares (including the lifting of such suspensions), increased swing factor adjustment and all other items for which notice is required.

Statements and confirmations are sent when there are transactions in your account. Other items are sent when issued.

Audited annual reports are available within six months of the end of the financial year.

Information on performance, by fund and share class, appears on nordea.lu.

The articles, the remuneration policy and certain other materials will be sent to the investor, or otherwise made available, free of charge upon request.

Other Disclosures

The following disclosures will be made in the financial report or in another appropriate periodic reporting, and where necessary on an ad hoc basis:

(i) changes to the Depositary's liability;

(ii) the loss of a financial instrument;

(iii) the percentage of each funds' assets which are subject to special arrangements arising for their illiquid nature;

(iv) any new arrangements for managing the liquidity of each fund;

(v) the current risk profile of each fund and the risk management systems employed by the AIFM to manage those risks;

(vi) any changes to the maximum level of leverage which the AIFM may employ on behalf of each fund as well as any right to the re-use of collateral or any guarantee granted under the leveraging arrangement;

(vii) the total amount of leverage employed by each fund.

*Shareholder notices: Where the information in the shareholder notice is only relevant for one investor, it may be sent only and directly to the address of record of that investor.

The SICAV-FIS

Operations and Business Structure

Name and registered office

Nordea Specialised Investment Fund, SICAV-FIS
562, rue de Neudorf L-2220 Luxembourg
Grand Duchy of Luxembourg

Legal structure Open-ended investment company organised as a société anonyme and qualifying as a société d'investissement à capital variable (SICAV-FIS)

Legal jurisdiction Luxembourg

Incorporated 25 June 2007

Duration Indefinite

Articles of incorporation First published in the Mémorial C, Recueil des Sociétés et Associations, on 23 Jult 2007. The most recent amendment was published in the Recueil Electronique des Sociétés et Associations (RESA) on 25 July 2021

Regulatory authority

Commission de Surveillance du Secteur Financier (CSSF)
283, route d'Arlon L-1150 Luxembourg
Grand Duchy of Luxembourg
cssf.lu

Registration number (Luxembourg Trade and Companies Register) B-129308

Financial year 1 January to 31 December

Capital Sum of the assets of all of the funds, at any time

Minimum capital (under Luxembourg law)
EUR 1,250,000 or equivalent in any other currency

Par value of shares None

Share capital and reporting currency EUR

Qualification as a SIF The SICAV-FIS was incorporated on the basis of the Law of 10 August 1915 on commercial companies under the form of a société anonyme (S.A.). The SICAV-FIS qualifies as a specialised investment fund (SIF) under the SIF Law and is an alternative investment fund (AIF) in the meaning of the AIFM Law which transposes the AIFM Directive.

Financial independence of the funds The assets and liabilities of each fund are segregated from those of other funds; there is no cross-liability, and a creditor of one fund has no recourse to the other funds.

To lower costs and increase diversification, the funds may commingle certain assets and manage them as a single pool. In such a case, the assets of each fund will remain segregated as far as accounting and ownership is concerned, and the allocation of performance and costs is assigned to each fund on a pro rata basis.

Board of Directors of the SICAV-FIS

Sinor Chhor (Chair)
Managing Director of Nordea Investment Funds S.A.
Luxembourg, Grand Duchy of Luxembourg

Rasmus Hald
Head of illiquid products
Nordea Investment Management AB, Danish Branch
Copenhagen, Denmark

Molla Stina Mâkilaine
Head of Governance Processes,
Nordea Funds Ltd, Helsinki, Finland

Marianne Philip
Independent Director
Copenhagen, Denmark

Jakob Jessen
Head of Investment Office/Fixed income & Equities
Nordea Investment Management AB, Danish Branch,
Copenhagen, Denmark

The board is responsible for the overall investment policy, objectives and management of the SICAV-FIS and funds and, as described more fully in the articles, has broad powers to act on behalf of the SICAV-FIS and the funds, including:

- appointing and supervising the AIFM
- setting investment policy and approving the appointment of any investment manager or sub-investment manager
- making all determinations regarding the launch, modification, merger or discontinuation of funds and share classes, including such matters as timing, pricing, fees, base currency, dividend policy and payment of dividends, liquidation of the SICAV-FIS, and other conditions
- determining eligibility requirements and ownership restrictions for investors in any fund or share class, and what steps may be taken in the case of any violation
- determining the availability of any share class to any investor or distributor or in any jurisdiction
- determining when and how the SICAV-FIS will exercise its rights and will distribute or publicize shareholder communications
- ensuring that the appointments of the AIFM and the depositary bank are consistent with the SIF Law and the AIFM Law and any applicable contracts of the SICAV-FIS
- determining whether to list any shares on the Luxembourg stock exchange

The board may delegate some of these responsibilities to the AIFM.

The board is responsible for the information in this prospectus and has taken all reasonable care to ensure that it is materially accurate and complete. The prospectus will be updated by the board with the prior approval of the CSSF as required when funds are added or discontinued or when other changes are made such as changes to the investment objective and policy. In case of material change you will be informed one month

before the changes become effective and will be offered to redeem from the SICAV-FIS free of charge.

Directors serve until their term ends, they resign, or their mandate is revoked, in accordance with the articles. Any additional directors will be appointed in accordance with the articles and Luxembourg law. Independent directors (directors who are not employees of Nordea Group or any of its affiliates) may receive compensation for serving on the board.

Professional Firms Engaged by the SICAV-FIS

The AIFM and various professional firms are engaged by the SICAV-FIS through service agreements and must provide periodic reports to the board relating to their services. Any professional firm must cooperate fully with a transition of its duties, consistent with its service agreement, its duties under law, and the instructions of the board.

AIFM

See **"The AIFM"** on page 35.

Depositary

State Street Bank international GmbH, Luxembourg Branch

17 Boulevard de Kockelscheuer,
L-1821 Luxembourg,
Grand Duchy of Luxembourg

The depositary provides such services as:

- providing safekeeping of the assets of the SICAV-FIS (custody of assets that can be held in custody and ownership verification and record keeping of other assets)
- ensuring that the sale, issue, repurchase, redemption and cancellation of shares are carried out in accordance with applicable law and the Articles
- ensuring that the value of the shares is calculated in accordance with applicable law and the Articles
- ensuring that in transactions involving the assets of the SICAV-FIS any consideration is remitted within the usual time limits
- ensuring that the income of the SICAV-FIS is applied in accordance with applicable law and the Articles
- monitoring of the SICAV-FIS' cash and cash flows
- fulfilling oversight duties to ensure that the activities defined in the depositary and custodian agreement are carried out in accordance with the board's instructions and, above all, with the AIFM Law, the AIFM Regulation and the articles of incorporation; these activities include the calculation of NAV, the processing of fund shares and the receipt and allocation of income and revenues to each fund and share class, among others
- cash flow monitoring

The depositary must use reasonable care in exercising its functions and is liable to the SICAV-FIS and shareholders for any losses that result from failing to properly perform its duties, as defined in the depositary and custodian agreement. It may entrust assets to third party banks, financial institutions or clearinghouses but this will not affect its liability.

Where the law of a third country requires that certain investments be held in custody by a local entity but no local entities satisfy the delegation requirement, the depositary may nevertheless delegate to a local entity so long as the SICAV-FIS has informed investors and has given the depositary appropriate instructions, and only for as long as no other local entity exists that meets the delegation requirements.

Up-to-date information on any safekeeping function delegated by the depositary and an up-to-date list of delegates is available at nordea.lu.

The depositary has no influence or control over the funds' investment decisions, and is not allowed to carry out activities with regard to the SICAV-FIS that may create conflicts of interest between the SICAV-FIS, the shareholders and the depositary itself (including its delegates), unless it has properly identified any such potential conflicts of interest, has functionally and hierarchically separated the performance of its depositary tasks from its other potentially conflicting tasks, and the potential conflicts of interest are properly identified, managed, monitored and disclosed to the SICAV-FIS and its shareholders.

The maximum depositary fee is shown in the **"Depositary fee"** section on page 23.

Auditor

PricewaterhouseCoopers Assurance, société cooperérative

2, rue Gerhard Mercator
L-2182 Luxembourg,
Grand Duchy of Luxembourg

The auditor provides independent review of the financial statements of the SICAV-FIS and all funds once a year. If performance fee are charged, the auditor also verifies all performance fee calculations.

Shareholder Meetings and Voting

The annual general meeting is held within 6 months of the end of each financial year, typically at the SICAV-FIS's registered office or another location within Luxembourg City, but potentially elsewhere if the board believes it warranted by exceptional circumstances. Other shareholder meetings may be held at other places and times, with appropriate approval and notification.

At the annual general meeting, shareholders generally vote on such matters as the election or re-election of board members, ratification of the auditors, and approval of distribution amounts and the financial report for the past year. Interim dividends can be declared by the board, subject to final approval at the annual meeting.

Written notice convening annual general meetings, including the agenda, date, time, and location, will be provided to shareholders as required by Luxembourg law. To the extent permitted by law, the convening notice to a general meeting of shareholders may provide that the quorum and majority requirements will be assessed against the number of shares issued and outstanding at midnight (Luxembourg time) on the fifth day prior to the relevant meeting, meaning that participation in the meeting will be based on the number of

shares held by each shareholder on that date. Resolutions that concern all shareholders generally will be taken in a general meeting.

Each share gets one vote in all matters brought before a general meeting of shareholders. Fractional shares do not have voting rights.

For information on admission and voting at any meeting, refer to the applicable meeting notice.

Shareholder rights when investing through an intermediary

Only investors registered in the register of shareholders can fully exercise their shareholder rights. When investing through an intermediary, investors may not be able to exercise certain shareholder rights such as voting in the SICAV-FIS's general meetings, or being indemnified in case of NAV calculation errors and/or non-compliance with the investment rules and/or other errors at the level of the SICAV-FIS. Consult your intermediary for more information on your shareholder rights.

Merger or Liquidation

Merger

Within the limits of the law and the articles, the board may decide to merge a fund with another fund within the SICAV-FIS, or with a fund in another Luxembourg SICAV-FIS, or with another fund of a Luxembourg UCI. The board may also decide to approve mergers of another SICAV-FIS into the SICAV-FIS.

The majority of votes cast at a shareholder meeting (with the quorum and majority requirements laid down by law) is however needed to transfer all shares of one or several funds through a merger if the merger implies:

- that the SICAV-FIS ceases to exist
- that a fund or the SICAV-FIS is merged into a foreign investment fund

No shareholder meeting is however needed for mergers into a foreign investment fund if only the shares of the shareholders who have approved such merger are effectively transferred to that foreign fund.

Furthermore, a merger into a mutual special investment fund in the form of a Fonds Commun de Placement ("FCP-FIS") will be binding only for shareholders who have expressly agreed to the merger.

Shareholders whose investments are involved in any merger will receive at least one month's advance notice of the merger, during which they will be able to redeem or switch their shares free of any redemption and switching charges. At the end of the notice period, shareholders who still own shares in a fund and class that is being merged out of existence and who have not expressly indicated their willingness to redeem their shares will receive shares of the receiving fund of the merger.

Liquidation of a fund or share class

The board may decide to liquidate a fund or share class if the board believes any of the following is true:

- the value of the assets of the fund or share class is so low as to make continued operation economically inefficient
- there has been a substantial change in political, economic, monetary or regulatory conditions or other circumstances beyond the control of the board
- the liquidation is appropriate as part of an economic rationalisation (such as an overall adjustment of fund offerings)
- to do so would be in the interests of shareholders
- for feeder funds, if the fund becomes a non-feeder fund, or if the master fund liquidates, merges, or splits, and the CSSF approves neither the feeder remaining with the split or merged master fund nor the appointment of a new master fund

If none of the above is true, the board must ask shareholders to approve the liquidation. Even if one of the above is true, the board may opt to submit the matter to a shareholder meeting for a vote. In either case, the liquidation is approved if it receives the votes of a simple majority of the shares present or represented at a validly held meeting (no quorum required).

Once a liquidation has been decided by the board or voted, shareholders must continue to hold their shares, participate in the liquidation process and receive any proceeds due.

Liquidation of the SICAV-FIS

The liquidation of the SICAV-FIS requires a shareholder vote. Such a vote can be taken at time at a general meeting of shareholders. If it is determined that the SICAV-FIS's capital has fallen below two-thirds of legally required minimum capital (under Luxembourg law), or below one-quarter of the minimum set by the articles, then shareholders must be given the opportunity to vote on dissolution at a general meeting held within 40 days of the determination.

Voluntary liquidations (meaning a decision to liquidate that is initiated by shareholders) require a quorum of at least one-half of the capital and approval by at least 2/3 of the votes cast. Otherwise, dissolution will occur if approved by a majority of the shares present and represented at the meeting, or, if the capital is below 1/4 of the minimum set by the articles, by 1/4 of the shares present and represented (no quorum required).

Should it be voted that the SICAV-FIS will liquidate, one or more liquidators appointed by the shareholder meeting and duly approved by the CSSF will liquidate the SICAV-FIS's assets in the best interest of shareholders and will distribute the net proceeds (after deduction of any costs relating to the liquidation) to shareholders in proportion to their holdings.

Amounts from any liquidations that are not claimed by shareholders within 6 months will be deposited in escrow with the Caisse de Consignation. Amounts still unclaimed after 30 years will be forfeited according to Luxembourg law.

Responsibilities

The AIFM is responsible for, among other things:

- investment management (including portfolio management and risk management) with respect to all funds
- administration, including corporate agency duties
- marketing

The AIFM is acting as UCI administrator for the SICAV-FIS is in this capacity performing registrar agent function and the client communication function in accordance with CSSF Circular 22/811 on the authorisation and organisation of entities acting as UCI administrator.

Concerning the registrar function, the AIFM handles the administrative work as transfer and registrar agent as required by law and regulation and by the articles of incorporation, calculation of the number of outstanding shares and maintaining the SICAV-FIS's register of shareholders and accounting records; opening and closing accounts; processing requests for transactions in fund shares; reconciliation of the transactions with the related cash flows and providing documentation of these transactions to shareholders.

The AIFM and the SICAV-FIS have delegated the NAV calculation and accounting function to the accounting agent (see **"Accounting Agent"** below). The accounting agent is responsible for the following operations: identification and correct recording of all accounting movements; valuation of liquid investments; valuation of complex and illiquid investments; determination of the amount of unrealized and realized gain/loss generated by those investments; calculation of income to be distributed to investors; compilation, provision and allocation of fees, commissions and taxes to be borne by the fund as well as all incomes to which the fund is entitled; conversion of operations in foreign currencies in the reference currency of the fund's books; calculation of the total NAV of the fund, and validation of the NAV per share; calculation of the exchange ratio in case of merger as well as subscription, redemption or distribution in kind; publication of the fund's NAV per share; maintenance of adequate records of the fund's activity relating to the NAV calculation and accounting function.

Concerning the client communication function, the AIFM make available offering document, financial reports and other documents intended for investors; drawing-up of the subscription or redemption contract notes and the certificates of title and the dispatch of such documents to the individual investors; maintenance of adequate records of the fund's activity relating to the client communication function.

Concerning distribution, the AIFM serves as the principal distributor. In this capacity it is responsible for all distribution, and marketing in jurisdictions in which the SICAV-FIS is permitted to engage in those activities.

Concerning corporate agency duties, the AIFM is responsible for all such duties required by Luxembourg law, in particular the mailing of shareholder documents.

The AIFM is authorised according to the AIFM Law.

The AIFM makes available to shareholders all information referred to in article 21 of the AIFM Law either in this prospectus or in the financial report.

Professional liability risk cover

The AIFM holds sufficient own funds to cover risk arising from its potential professional negligence resulting from the activities the AIFM may carry out pursuant to the AIFM Law.

Delegation of Responsibilities

With the consent of the SICAV-FIS and the CSSF, the AIFM has the option of delegating to third parties portfolio management, administration and marketing responsibilities so long as it retains supervision, implements appropriate controls and procedures, and updates the prospectus in advance. For example, the AIFM can appoint one or more investment managers to handle the day-to-day management of fund assets, or investment advisors to provide investment information, recommendations and research concerning prospective and existing investments. The AIFM will pay a remuneration out of the management fee of the respective fund to the investment manager for the services rendered.

An investment manager in turn can, with the approval of the AIFM, appoint one or more sub-investment managers. The remuneration of the sub-investment managers will be paid by the investment manager out of its own fee.

The investment manager or a sub-investment manager may also appoint investment advisors (meaning entities that provide recommendations but do not have the ability to set strategy or place trades in portfolio securities). Information about which entities currently have appointments as investment managers and sub-investment managers, and to which funds, appears in **"Fund Descriptions"**.

The AIFM must require any delegated entity to comply with the provisions of the prospectus, articles of incorporation and other applicable provisions. Also, regardless of the nature and extent of its delegations, the AIFM remains liable for the actions of its delegates.

The AIFM can also appoint various service providers, including distributors, to market and distribute fund shares in any jurisdiction where the shares are approved for sale.

The investment managers, sub-investment managers and sub-investment advisors and all service providers engaged by the AIFM have agreements to serve for an indefinite period and must provide periodic reports relating to their services. The AIFM may terminate any of these agreements immediately if it determines that it is in the interest of shareholders. Otherwise, a party of any of these agreements can resign or be replaced by the AIFM. The AIFM will pay any costs associated with a termination of any direct delegates and other service providers.

Complaints handling

The AIFM makes every effort to respond to all formal complaints quickly. A copy of our complaints procedure is available to shareholders free of charge upon request and information on the Complaints Handling procedure is available at nordea.lu.

Any legal disputes involving the AIFM, the SICAV-FIS or any shareholder will be subject to the jurisdiction of the competent Luxembourg court and adjudicated under Luxembourg law (except that for service providers, the process is as described in their contracts with the SICAV-FIS or the AIFM).

Corporate Conduct Policies

Conflicts of interest

Because the AIFM, an investment manager and certain sub-distributors are all part of the Nordea Group, they will at times find their obligations to the SICAV-FIS or to a fund to be in conflict with other professional obligations they have pledged to honour. A Nordea Group entity could be an issuer or counterparty for a security or derivative a fund is considering buying or selling. In addition, a Nordea Group entity that serves the SICAV-FIS in a given capacity could serve another UCI (whether affiliated with Nordea Group or not) in a similar or different capacity.

Other service providers, such as the depositary, administrative agent and central administration agent could have potential conflicts in interest with the SICAV-FIS or the AIFM. In such cases, the AIFM seeks to identify, manage and, where necessary, prohibit any action or transaction that could pose a conflict between the interests of, for example, the AIFM and shareholders, or the SICAV-FIS and other clients. The AIFM strives to manage any conflicts in a manner consistent with the highest standards of integrity and fair dealing. Information on the AIFM's conflict of interest policy is available at nordea.lu.

Remuneration policy

The AIFM has implemented a remuneration policy, based on that of Nordea Group, that is consistent with, and promotes, sound and effective risk management and does not encourage risk taking that is inconsistent with the risk profile of the funds. The AIFM has committed to ensuring that all individuals subject to the policy — which includes the AIFM's directors, managers and employees — will comply with the policy.

The remuneration policy integrates governance, a pay structure that is balanced between fixed and variable components, and risk and long-term performance alignment rules. These alignment rules are designed to be consistent with the interests of the AIFM, the SICAV-FIS and the shareholders, with respect to such considerations as business strategy, objectives, values and interests, and include measures to avoid conflicts of interest. The AIFM ensures that the calculation of any variable remuneration is based on the applicable multi-year performance of the relevant fund(s) and that the actual payment of such remuneration is spread over the same period. Employees in control functions do not receive variable remuneration.

Information on the remuneration policy is available at nordea.lu.

Best execution

The investment managers and sub-investment managers, consistent with their duty to act in the best interests of shareholders, have an obligation to execute orders on terms most favourable to their clients.

Voting of portfolio securities

The SICAV-FIS has delegated the exercise of voting rights to the AIFM.

Benchmarks

Benchmarks may be used by some funds as a reference for comparison purposes against which the performance of each fund is measured, as indicated in the **"Fund Descriptions"**. The funds are actively managed, and the investment manager may freely select the securities that it will invest in. Consequently the performance may differ substantially from that of the benchmark. The SICAV-FIS does not have any tracker funds (being funds tracking the return of an index or combination of indices).

As of 1 January 2020, any benchmark that is used to calculate performance fees, track the return of an index or define the asset allocation of a portfolio must comply with Regulation (EU) 2016/1011 of 8 June 2016, as amended from time to time, on indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds (the "Benchmark Regulation"). This means that a benchmark must either be provided by a registered provider or must itself be registered (if the provider is based outside the EU).

Funds may use interest rate benchmarks for the purpose of performance fee calculation. The AIFM has a written plan for what it will do if a benchmark that must comply with the Benchmark Regulation fails to do so or changes materially or ceases to be provided. The plan is available upon request and free of charge at the registered office of the AIFM.

Investment Managers Engaged by the AIFM

Nordea Investment Management AB (including branches)
Mäster Samuelsgatan 21, M540 Stockholm 10571, Sweden.

Other Service Providers Engaged by the AIFM and/or the SICAV-FIS

Accounting Agent

State Street Bank international GmbH, Luxembourg Branch

17 Boulevard de Kockelscheuer, L-1821 Luxembourg, Grand Duchy of Luxembourg.

Distributors and nominees

The SICAV-FIS and/or the AIFM can engage local distributors or other agents in countries or markets where it is not barred from distributing fund shares. In some countries, use of an agent is mandatory, and the agent may not merely facilitate transactions but may hold shares in its own name on behalf of investors. Fees of distributors and agents are paid out of the management fee.

Distributors can act as nominees, which may affect your rights as an investor. See **"Share Class Policies"** on page 24.

Interpreting this prospectus

The following rules apply unless law, regulation or context require otherwise. terms that are defined in the SIF Law and /or AIFM Law but not here have the same meaning as in the SIF and AIFM Law.

- the words "include", "such as" or "for example", in any form, does not denote comprehensiveness
- a reference to an agreement includes any undertaking, deed, agreement and legally enforceable arrangement, whether or not in writing, and a reference to a document includes an agreement in writing and any certificate, notice, instrument and document of any kind
- a reference to a document, agreement, regulation or legislation refers to the same as it has been amended or replaced (except as prohibited by this prospectus or applicable external controls), and a reference to a party includes the party's successors or permitted substitutes and assigns
- a reference to legislation includes reference to any of its provision and any rule or regulation promulgated under the legislation
- any conflict in meaning between this prospectus and the articles will be resolved in favor of the prospectus for "Fund Descriptions" and in favor of the articles in all other cases

Appendix I – SFDR related information

Information relating to the environmental and social characteristics of the funds are provided in the below annexes in accordance with the SFDR.

Contents

Appendix I – SFDR related information 39

Nordea Specialised Investment Fund, SICAV-FIS – European Senior Loan Fund 40

Nordea Specialised Investment Fund, SICAV-FIS – Global Infrastructure Fund 46

Nordea Specialised Investment Fund, SICAV-FIS – Global Private Credit Fund 52

Nordea Specialised Investment Fund, SICAV-FIS – Global Private Equity Fund 58

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Nordea Specialised Investment Fund, SICAV-FIS - European Senior Loan Fund

Legal entity identifier: 549300KU6TSJ5PE2H848

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective**: ___%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of **sustainable investments with a social objective**: ___%

☒ **No**

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of ___% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with a social objective
- ☒ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The E/S characteristics promoted can be environmental and/or social and include the following features:

Sector- and value-based exclusions The fund promotes E/S characteristics by excluding companies that are deemed to be inappropriate based on their business activities or corporate behaviour.

NAM's Paris-Aligned Fossil Fuel Policy The fund promotes E/S characteristics by refraining from investing in companies that have significant exposure to fossil fuels unless they have a credible transition strategy.

These characteristics are achieved by applying certain exclusion criteria as further described in the section "What are binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?"

There is no reference benchmark designated for the purpose of attaining the E/S characteristics of the fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

To measure the attainment of the environmental or social characteristics, the investment manager will use the following indicators:

- % investments in companies not exceeding maximum threshold of tobacco-related activities
- % investments in companies not exceeding maximum threshold of fossil fuel related activities or covered by NAM Fossil Fuel Policy

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ No, as the regulation and standards of non-financial reporting is rapidly developing, data quality, coverage and accessibility remains challenging – especially for private or smaller companies and less developed markets. PAI are therefore currently not considered for the fund.
☐ Yes

What investment strategy does this financial product follow?

The general investment policy of the fund, including investment universe and benchmark, is further detailed in the Investment Objective and Policy section of the prospectus.

The E/S characteristics that are promoted by the fund, are integrated in the investment process on a binding basis as described in the section "What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?".

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

ESG is integrated into the strategy by excluding companies and issuers due to their exposure to certain activities that have been deselected based on ESG considerations.

As part of the investment process, companies are screened to ensure that they follow good governance practices.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The binding elements are documented and monitored on an ongoing basis. Separately, NAM has risk management processes in place to control financial and regulatory risk and ensure appropriate escalation of any potential issues within a clear governance structure.

NAM conducts a thorough due diligence on external data vendors to clarify applied methodologies and verify data quality. However, as the regulation and standards of non-financial reporting is rapidly developing, data quality, coverage and accessibility remains challenging, especially for smaller companies and less developed markets.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

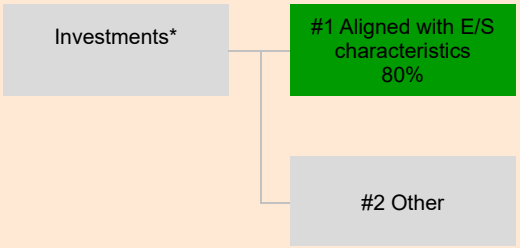

What is the policy to assess good governance practices of the investee companies?

Good governance practices of investee companies are addressed in various layers of the security selection process of direct investments. Companies are screened to identify any controversies or breaches of international norms that may warrant exclusion. The screenings use data from selected external providers supplemented by internal research in case of missing or unreliable data. In addition, companies are screened for good governance by assessing, among other elements, their employee relations, pay practices, management structures and tax compliance.

What is the asset allocation planned for the financial product?

The fund commits to minimum proportion of investments as illustrated below. Where no percentage proportion or 0% is displayed, such investments may be relevant for the strategy but the fund is not committed to holding a specific proportion at all times, and the proportion of such investments may be as low as 0% at the investment manager's discretion. The investment manager has some flexibility to allocate between different types of investments and the sum of the minimum proportions may not equal the fund's total commitments.

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

*Investments refer to the fund's NAV which is the total market value of the fund.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Derivatives are not used to attain the environmental or social characteristics promoted by the fund.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The minimum proportion of investments that are aligned with the EU Taxonomy is 0%. Sufficiently reliable data on Taxonomy-alignment is scarce and the data coverage remains too low to support a meaningful commitment to a minimum proportion of Taxonomy-aligned investments in this fund. It cannot be excluded that some of the fund's holdings qualify as Taxonomy-aligned investments. Disclosures and reporting on taxonomy-alignment will develop as the EU framework evolves and data is made available by companies.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy?

☐ Yes

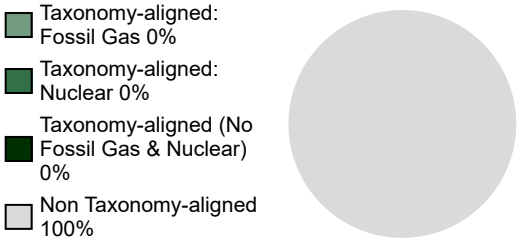

☐ In fossil gas ☐ In nuclear energy

☒ No

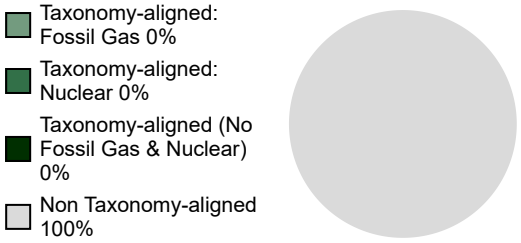

Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

2. Taxonomy-alignment of investments **excluding sovereign bonds***

This graph represents 100% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

There is no commitment to a minimum proportion of investments in transitional and enabling activities.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

Cash may be held as ancillary liquidity or for risk balancing purposes. The fund may use derivatives and other techniques for the purposes described in the ‘Fund Descriptions’ in the prospectus. This category may also include securities for which relevant data is not available. Minimum environmental or social safeguards are not applicable.

Where can I find more product specific information online?

More product-specific information can be found on nordea.lu

Additional information as referenced in the above sections is available here:
Sustainability-related information
Responsible Investment Policy
Exclusion list

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Nordea Specialised Investment Fund, SICAV-FIS - Global Infrastructure Fund

Legal entity identifier: 549300Y5051M1UJPOV49

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective**: ___%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of **sustainable investments with a social objective**: ___%

☒ **No**

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of ___% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with a social objective
- ☒ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The E/S characteristics promoted can be environmental and/or social and include the following features:

ESG due diligence and proprietary assessment The investment manager integrates environmental and social considerations and ensures good governance as part of the due diligence process of each investee fund and investee fund manager. Ultimately, the due diligence leads to a proprietary ESG-assessment, where a minimum ESG-level is required to be eligible for investment. The assessment creates transparency and comparability over time and outlines points for monitoring as well as potential areas for future engagement.

Sector- and value-based exclusions The fund promotes E/S characteristics by incorporating in the contractual framework exclusion of assets that are deemed to be materially harmful to environmental and/or the society at large.

These characteristics are achieved by applying certain exclusion criteria as further described in the section “What are binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?”

There is no reference benchmark designated for the purpose of attaining the E/S characteristics of the fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

To measure the attainment of the environmental or social characteristics, the investment manager will use proprietary data from the underlying investments;

- Proportion of investments with ESG policy or specific ESG targets
- Proportion of investments supporting a recognized ESG initiative
- Proportion of investments providing ESG reporting

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☐ No

☒ Yes, Investment teams collect PAI related data annually directly from investee funds and/or investee companies. The specific PAI indicators that are taken into consideration are subject to data quality and availability.

Information on PAI on sustainability factors is available in the annual report to be disclosed pursuant to SFDR Article 11(2).

What investment strategy does this financial product follow?

The general investment policy of the fund, including investment universe and benchmark, is further detailed in the Investment Objective and Policy section of the prospectus.

The E/S characteristics that are promoted by the fund, are integrated in the investment process on a binding basis as described in the section "What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?".

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund makes commitments to private infrastructure funds that are in turn investing in private portfolio companies. By nature of the asset class, all investments are illiquid and primarily entered into on a forward-looking basis. The ESG characteristics of the fund is based on a combination of due diligence of the investee funds' managers and the principles from NAM's Responsible Investment Policy in terms of sector- and value-based exclusions of companies, at the time of investment.

As part of the investment process, investee funds and managers are screened to ensure that they follow good governance practises for both their own management companies and in relation to their investee companies.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund adheres to the principles of the NAM Responsible Investment Policy, ensuring a contractual framework with appropriate sector- and value-based exclusions for each new investment. The fund will prevent investee funds and managers from investing in portfolio companies that are subject to international sanctions or with exposure to controversial weapons, adult entertainment, gambling, addictive substances.

The binding elements are documented and monitored on an ongoing basis. Separately, NAM has risk management processes in place to control financial and regulatory risk and ensure appropriate escalation of any potential issues within a clear governance structure.

NAM conducts a thorough due diligence on external data vendors to clarify applied methodologies and verify data quality. However, as the regulation and standards of non-financial reporting is rapidly developing, data quality, coverage and accessibility remains challenging, especially for smaller companies and less developed markets.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

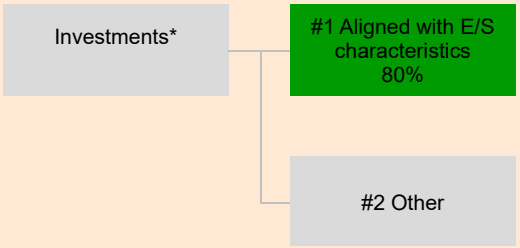

What is the policy to assess good governance practices of the investee companies?

Good governance practices of investee funds and managers are ensured in various layers of the due diligence process. Investee funds and managers are assessed for, among other elements, their employee relations, pay practices, management structures and tax compliance both internally and in relation to their investee companies.

What is the asset allocation planned for the financial product?

The fund commits to minimum proportion of investments as illustrated below. Where no percentage proportion or 0% is displayed, such investments may be relevant for the strategy but the fund is not committed to holding a specific proportion at all times, and the proportion of such investments may be as low as 0% at the investment manager's discretion. The investment manager has some flexibility to allocate between different types of investments and the sum of the minimum proportions may not equal the fund's total commitments.

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

*Investments refer to the fund's NAV which is the total market value of the fund.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Derivatives are not used to attain the environmental or social characteristics promoted by the fund.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The minimum proportion of investments that are aligned with the EU Taxonomy is 0%. It cannot be excluded that some of the fund's holdings qualify as Taxonomy-aligned investments, but there is no commitment to hold in a minimum proportion of such investments in the fund.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy?

☐ Yes

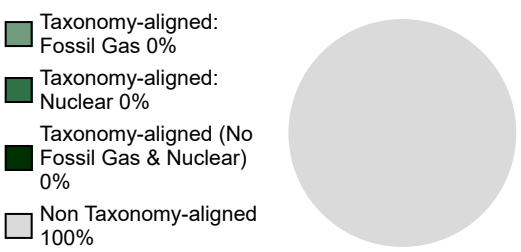

☐ In fossil gas ☐ In nuclear energy

☒ No

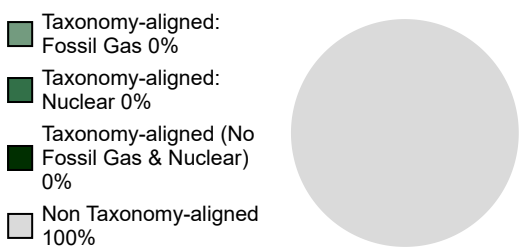

Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

2. Taxonomy-alignment of investments **excluding sovereign bonds***

This graph represents 100% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

There is no commitment to a minimum proportion of investments in transitional and enabling activities.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

Cash may be held as ancillary liquidity or for risk balancing purposes. This category may also include certain legacy investments for which relevant data is not available to assess that the environmental or social characteristics promoted by this fund have been attained. Minimum environmental or social safeguards are not applicable.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective**: ___%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of **sustainable investments with a social objective**: ___%

☒ **No**

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of ___% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with a social objective
- ☒ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The E/S characteristics promoted can be environmental and/or social and include the following features:

ESG due diligence and proprietary assessment The investment manager integrates environmental and social considerations and ensures good governance as part of the due diligence process of each investee fund and investee fund manager. Ultimately, the due diligence leads to a proprietary ESG-assessment, where a minimum ESG-level is required to be eligible for investment. The assessment creates transparency and comparability over time and outlines points for monitoring as well as potential areas for future engagement.

Sector- and value-based exclusions The fund promotes E/S characteristics by incorporating in the contractual framework exclusion of assets that are deemed to be materially harmful to environmental and/or the society at large.

These characteristics are achieved by applying certain exclusion criteria as further described in the section “What are binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?”

There is no reference benchmark designated for the purpose of attaining the E/S characteristics of the fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

To measure the attainment of the environmental or social characteristics, the investment manager will use proprietary data from the underlying investments;

- Proportion of investments with ESG policy or specific ESG targets
- Proportion of investments supporting a recognized ESG initiative
- Proportion of investments providing ESG reporting

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☐ No

☒ Yes, Investment teams collect PAI related data annually directly from investee funds and/or investee companies. The specific PAI indicators that are taken into consideration are subject to data quality and availability.

Information on PAI on sustainability factors is available in the annual report to be disclosed pursuant to SFDR Article 11(2).

What investment strategy does this financial product follow?

The general investment policy of the fund, including investment universe and benchmark, is further detailed in the Investment Objective and Policy section of the prospectus.

The E/S characteristics that are promoted by the fund, are integrated in the investment process on a binding basis as described in the section "What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?".

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund makes commitments to private credit funds that are in turn lending to private borrowers. By nature of the asset class, all investments are illiquid and primarily entered into on a forward-looking basis. The ESG characteristics of the fund is based on a combination of due diligence of the investee funds' managers and the principles from NAM's Responsible Investment Policy in terms of sector- and value-based exclusions of companies, at the time of investment.

As part of the investment process, investee funds and managers are screened to ensure that they follow good governance practises for both their own management companies and in relation to their investee companies.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

Assessment of ESG-integration for all new investments and periodic review of existing investments

The fund adheres to the principles of the NAM Responsible Investment Policy, ensuring a contractual framework with appropriate sector- and value-based exclusions for each new investment. The fund will prevent investee funds and managers from investing in portfolio companies that are subject to international sanctions or with exposure to controversial weapons, adult entertainment, gambling, addictive substances or fossil fuels, unless a clear strategy for business model alignment with the Paris Agreement can be demonstrated.

The binding elements are documented and monitored on an ongoing basis. Separately, NAM has risk management processes in place to control financial and regulatory risk and ensure appropriate escalation of any potential issues within a clear governance structure.

NAM conducts a thorough due diligence on external data vendors to clarify applied methodologies and verify data quality. However, as the regulation and standards of non-financial reporting is rapidly developing, data quality, coverage and accessibility remains challenging, especially for smaller companies and less developed markets.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

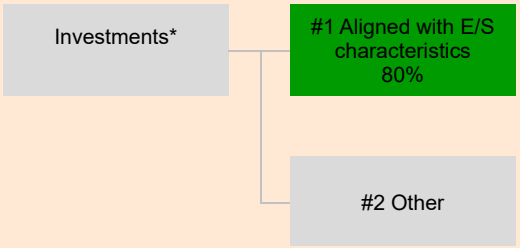

What is the policy to assess good governance practices of the investee companies?

Good governance practices of investee funds and managers are ensured in various layers of the due diligence process. Investee funds and managers are assessed for, among other elements, their employee relations, pay practices, management structures and tax compliance both internally and in relation to their investee companies.

What is the asset allocation planned for the financial product?

The fund commits to minimum proportion of investments as illustrated below. Where no percentage proportion or 0% is displayed, such investments may be relevant for the strategy but the fund is not committed to holding a specific proportion at all times, and the proportion of such investments may be as low as 0% at the investment manager's discretion. The investment manager has some flexibility to allocate between different types of investments and the sum of the minimum proportions may not equal the fund's total commitments.

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

*Investments refer to the fund's NAV which is the total market value of the fund.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Derivatives are not used to attain the environmental or social characteristics promoted by the fund.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The minimum proportion of investments that are aligned with the EU Taxonomy is 0%. It cannot be excluded that some of the fund's holdings qualify as Taxonomy-aligned investments, but there is no commitment to hold in a minimum proportion of such investments in the fund.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy?

☐ Yes

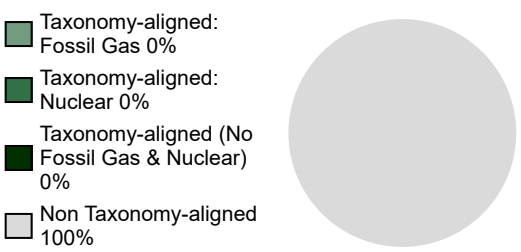

☐ In fossil gas ☐ In nuclear energy

☒ No

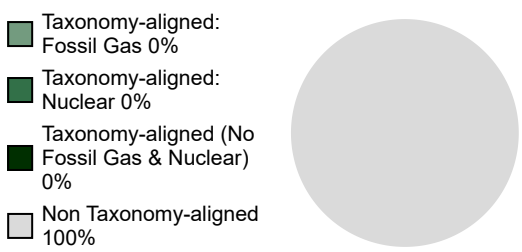

Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

2. Taxonomy-alignment of investments **excluding sovereign bonds***

This graph represents 100% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum share of investments in transitional and enabling activities?

There is no commitment to a minimum proportion of investments in transitional and enabling activities.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

Cash may be held as ancillary liquidity or for risk balancing purposes. This category may also include certain legacy investments for which relevant data is not available to assess that the environmental or social characteristics promoted by this fund have been attained. Minimum environmental or social safeguards are not applicable.

Responsible Investment Policy
Exclusion list

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Nordea Specialised Investment Fund, SICAV-FIS - Global Private Equity Fund

Legal entity identifier: 54930032HLYZ77YZSK85

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective**: ___%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of **sustainable investments with a social objective**: ___%

☒ **No**

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of ___% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with a social objective
- ☒ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The E/S characteristics promoted can be environmental and/or social and include the following features:

ESG due diligence and proprietary assessment The investment manager integrates environmental and social considerations and ensures good governance as part of the due diligence process of each investee fund and investee fund manager. Ultimately, the due diligence leads to a proprietary ESG-assessment, where a minimum ESG-level is required to be eligible for investment. The assessment creates transparency and comparability over time and outlines points for monitoring as well as potential areas for future engagement.

Sector- and value-based exclusions The fund promotes E/S characteristics by incorporating in the contractual framework exclusion of assets that are deemed to be materially harmful to environmental and/or the society at large.

These characteristics are achieved by applying certain exclusion criteria as further described in the section “What are binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?”

There is no reference benchmark designated for the purpose of attaining the E/S characteristics of the fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

To measure the attainment of the environmental or social characteristics, the investment manager will use proprietary data from the underlying investments;

- Proportion of investments with ESG policy or specific ESG targets
- Proportion of investments supporting a recognized ESG initiative
- Proportion of investments providing ESG reporting

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☐ No

☒ Yes, Investment teams collect PAI related data annually directly from investee funds and/or investee companies. The specific PAI indicators that are taken into consideration are subject to data quality and availability.

Information on PAI on sustainability factors is available in the annual report to be disclosed pursuant to SFDR Article 11(2).

What investment strategy does this financial product follow?

The general investment policy of the fund, including investment universe and benchmark, is further detailed in the Investment Objective and Policy section of the prospectus.

The E/S characteristics that are promoted by the fund, are integrated in the investment process on a binding basis as described in the section "What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?".

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund makes commitments to private equity funds that are in turn investing in private portfolio companies. By nature of the asset class, all investments are illiquid and primarily entered into on a forward-looking basis. The ESG characteristics of the fund is based on a combination of due diligence of the investee funds' managers and the principles from NAM's Responsible Investment Policy in terms of sector- and value-based exclusions of companies, at the time of investment.

As part of the investment process, investee funds and managers are screened to ensure that they follow good governance practises for both their own management companies and in relation to their investee companies.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

Assessment of ESG-integration for all new investments and periodic review of existing investments

The fund adheres to the principles of the NAM Responsible Investment Policy, ensuring a contractual framework with appropriate sector- and value-based exclusions for each new investment. The fund will prevent investee funds and managers from investing in portfolio companies that are subject to international sanctions or with exposure to controversial weapons, adult entertainment, gambling, addictive substances or fossil fuels, unless a clear strategy for business model alignment with the Paris Agreement can be demonstrated.

The binding elements are documented and monitored on an ongoing basis. Separately, NAM has risk management processes in place to control financial and regulatory risk and ensure appropriate escalation of any potential issues within a clear governance structure.

NAM conducts a thorough due diligence on external data vendors to clarify applied methodologies and verify data quality. However, as the regulation and standards of non-financial reporting is rapidly developing, data quality, coverage and accessibility remains challenging, especially for smaller companies and less developed markets.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

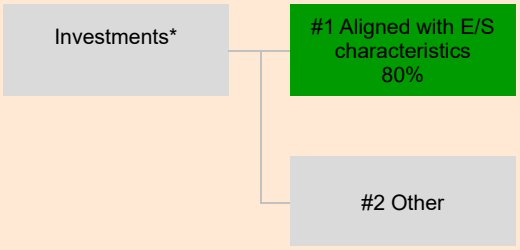

What is the policy to assess good governance practices of the investee companies?

Good governance practices of investee funds and managers are ensured in various layers of the due diligence process. Investee funds and managers are assessed for, among other elements, their employee relations, pay practices, management structures and tax compliance both internally and in relation to their investee companies.

What is the asset allocation planned for the financial product?

The fund commits to minimum proportion of investments as illustrated below. Where no percentage proportion or 0% is displayed, such investments may be relevant for the strategy but the fund is not committed to holding a specific proportion at all times, and the proportion of such investments may be as low as 0% at the investment manager's discretion. The investment manager has some flexibility to allocate between different types of investments and the sum of the minimum proportions may not equal the fund's total commitments.

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

*Investments refer to the fund's NAV which is the total market value of the fund.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Derivatives are not used to attain the environmental or social characteristics promoted by the fund.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The minimum proportion of investments that are aligned with the EU Taxonomy is 0%. It cannot be excluded that some of the fund's holdings qualify as Taxonomy-aligned investments, but there is no commitment to hold in a minimum proportion of such investments in the fund.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy?

☐ Yes

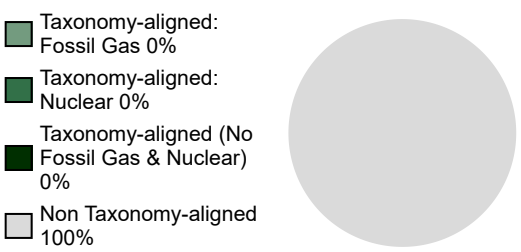

☐ In fossil gas ☐ In nuclear energy

☒ No

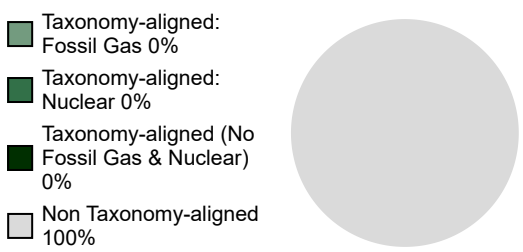

Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.
